# How Millions of Men In War are Moved, Fed

Nork of S. O. S. in France Excels All History of Military Feats.

## **BUICK S**ERVICE IS THE RULE

Army Uses 1,500,000 Pounds of Refrig erated and Fresh Beef Each Day -Immense Supplies Needed to Feed Yanks-Works Like a Machine.

By CHARLES N. WHEELER.

(In the Chicago Tribune.) In the S. O. S. Sector, France.-The matter of feeding the army in France prepartions.

Just now it requires about 1,500,000 pounds of refrigerated and fresh beef to feed the army in France each day, besides the hundreds of thousands of penads of bacon, mutton, ham, corned beef, canned salmon, and dried and pickled meats and fish. More than 200,cans of tomatoes, corn and peas help to make up one day's rations.

Something like 230,000 cans of jam, 8,800 cans of peaches, 5,000 jars of pickles, 3,000 bottles of catsup, carlongs of canned lobster and other sea foods, more than 2,000 boxes of chocolate, fresh white bread made of American flour and all the boys want, even the good old corn bread served hot, besides the immense quantities of pota- face of the West Pointer. tees, beans, prunes, coffee, sugar, milk. pepper, salt. vinegar, cinnamon, sirup, it. That's all. and about everything found in a wellstocked farmer's pantry in the United | There was no philosophy to it. Just States are laid before the American army in France every day—and it is all there right on the dot.

Works Like a Machine. spot in the whole country, including try to tell you something about it. the sections under heavy shell fire, where the S. O. S. is not standing at attration when the dinner bell rings.

Meantime, men and munitions, and all manner of supplies are moving up to the front continuously, and the aghters are coming back for a little rest. The nachinery works smoothly - and efficiently. There are side lines of great interest. One of these is the traveling bathroom. An outfit that reswires only three trucks is now sent up to the lines to greet the boys as they come out of the trenches and give them a fine scrubbing. Each outfit will wash 500 boys an hour.

Meantime the S. O. S. is filling orders from the front. It may be a few thousand infantry, an artillery regiment or several such regiments, machine gun companies, and so on through the list. They are delivered immediately.

The wounded have to be brought back to the hospitals. The trains and ambalances are ready and they move Mke clockwork-except that getting back from the first-aid stations at times is not quite as slow as a clock. The France and the big machine works on almost faultlessly.

Whole armies of the mobile sections ter to sector. It is up to the S. O. S. to see that all this equipment is pro-

### Salvage Work Important.

The S. O. S. besides doing an enorstream of battlefield wreckage. In the are saving the taxpayers back home tonnage.

At one station mammoth American lecemotives are assembled "while you tegether every day and are doing their bit the next day.

It was found advisable to operate a special train for American military men between two widely separated points in France. As soon as the necessky presented itself the train was installed. It is called the "American Special." It is manned by Pullman car porters negro boys who have had long training on the de luxe trains back home. They are rated as first class wagon men here. American railway conductors have been assigned to this train, or trains, one running each way

Of one thing the mothers back home may be thoroughly assured, and that is that not one of their boys wants for a single thing in the way of subsistence and medical and surgical attention. No army ever took the field better provided. And while the appreciations are being passed around it is not out of place to observe that the subsistence division of the war department at Washington is entitled to a decoration

for the efficiency it has achieved. Something over 300,000 enlisted men and about 25,000 women comprise the "help" in the S. O. S. organization. A. large number of officers, of course, are required for the supervising positions, but practically all of the workers are men in khaki who have been termed the "ammunition passers."

Employs Army of Women. Of the 25,000 women in the work of them are French women. A two fold aim is achieved in the utilization of these women. A large per-

against the state unless afforded this means of sustaining themselves.

Not the least serious of the problems confronting the war department was the question of distribution of supplies in France. A million men might be landed in French ports, together with the necessary equipment, but how under the heavens was this vast storehouse to be transported to the interior and on up to the lines, with the manifold exactions that would have to be met in doing it speedily and orderly and with the French transportation facilities already groaning under the home load? The German staff agreed it could not be done.

Right here seems a good place to introduce Brig. Gen. Johnson Hagood. He is chief of staff of the S. O. S. He has served in the war department is an epic story. It is truly of heroic with every chief of staff of the army since the general staff was created by congress. He is a native of South Carolina, a nephew of the late Brig. Gen. Johnson Hagood of the Confederate army and one time governor of South Carolina.

> The present chief of staff attended the university of his home Jate from 1888 to 1891 and graduated from West Point in 1896. He has served as personal aide to Generals Bell and Wood. General Hagood is one of the younger generals of the army. He is small of stature, quick of action, and a human dynamo. His mind works like trains, and pass it on up to the front. chain lightning.

"How did you do it?" I asked him.

"Well, we had to do it-and we did It was a mere statement of fact.

had to be done, and-was done! "It would be impossible for me to tell you how this plan has been worked out," he added. "Moreover, I am not It is there in every section of France, permitted to give out interviews to transportation. No possible form of from Soissons and Toul to Marseilles newspaper men. #### ASTRIDE PLANE UPSIDE DOWN; RIDES TO EARTH

London.-A British airman, while flying at a height of 1,600 feet, had the tail of his machine shot off by a direct hit from a shell. The machine turned upside down and the pilot was thrown from his seat, but he managed to clamber onto the bottom of the fusilage, on which he remained astride.

Although the machine was out of control, he managed, by moving forward and backward. to balance it and glide steadily downward, Under a strong anti-aircraft fire he crossed the German lines successfully a few hundred feet from the ground. His machine came down with a crash and he received some injuries, but will recover.

city of 15,000 inhabitants, with all the necessary appliances in the way of water, sewerage, stores, fire protection, lighting system, etc. Imagine all the retail stores in Chicago consolidated into one, and you get an idea of what it means when we say a depot containing ninety days' supply for 1,000,000. Think of a cold storage plant where 20,000 head of cattle, or 80,000 quarters of beef, can be provided for under one roof.

"Of course, we only handle this end of it. Our job over here is to get the stuff off the ships, get it on the It comes in a never-ending stream.

ABRAHAM GIVING ISAAC TO GOD.

LESSON TEXT-Genesis 22:1-14. GOLDEN TEXT-I will give him unto the Lord all the days of his life .- I Sam-

DEVOTIONAL READING-Luke 14:26-ADDITIONAL MATERIAL TEACHERS-Genesis 15:1-6; 18:9-15; 21-1-12.

1. Abraham Tested (vv. 1, 2). God does not tempt men to sin

(James 1:13), but he subjects them to rigid tests to prove them. In the treatment of Abraham we have a supreme example. God tested Abraham, not Lot. Sodon tested Lot. God tests the man who is proof against the tests of Sodom. God had promised Abraham an heir through whom blessings were to come to the world. For many years his faith was sorely tried in waiting for its fulfillment. At length, his heart rejoiced in the realization of that hope. In the lad in the patriarch's tent were wrapped Abraham's hopes of the future when his seed should be as the stars for multitude. His was no ordinary expectation. The human affections and hopes were, no doubt, included; but a new nation was to spring from him, and Isaac was the sole link making the connection. The too, he saw the coming Redeemer, for "Abraham saw my day and was glad" (John 8:56). It is only as we thus see all that Isaac meant to his father and God's purpose for the future of the world, that we really can appreciate the crucial test that came to Abraham. A test in some sense simifar comes to many Christian fathers and mothers. God is calling for sons and daughters to be offered on the altar of his service. The test is something terrific, as some who have given up sons and daughters for the mission field can testify. It is only as God is known to be almighty (Genesis 17:1) shall ability be given to give them up. II. Abraham Standing the Test (vv. 2-10).

1. On the way (vv. 3, 4). Abraham promptly obeyed. There was neither hesitancy nor arguing. God had issued the command. At his call Abraham said: "Here am I" (v. 1). He could not say "No" to God. In the ordinary affairs of life we call a man weak who cannot say "No," who has no will of his own; but the man who could not say "No" to God, we count strong. Early in the morning he was on the way to the place of which God had told him. All who really believe in God will yield themselves to him without question, reserve, or shrinking. Anything short of this is not consecration. We should not stop to ask how or why. It is enough to know that God has spoken.

2. "Abide ye here" (v. 5). This testing experience was too sacred for human eyes to gaze upon. How like this the words of Jesus in Gethsemane: "Tarry ye here." Human sympathy is sweet, and is to be prized, but we need to be alone in times of great testing. There are times when human sympathy hinders us from doing our duty. When Abraham said: "We will come down again to you," he spoke sincerely, for he believed that God would give him Isaac back from the dead (Heb. 11:19).

3. Isaac bearing the wood upon which he is to be offered (vv. 6, 7). This reminds us of Christ bearing the cross on the way to Calvary. Isaac must have been now a young man. He did not resist or cry out, but graciously submitted, showing that he is making a willing sacrifice.

4. The angel of the Lord calls (vv. 8-12). At the critical moment when Abraham's hand had lifted the gleaming blade to make real the offering, God interfered. God did not want human sacrifice as a burnt offering, but he wanted Abraham to give up to him his best, the surrender of his will to him. God is always pleased with submissive obedience. "To obey is better than sacrifice." Many times we are face to face with the test of giving up our fondest hopes and purposes, but when we have met the test as Abraham did, we get back our offering or greater things instead.

III. God Will Provide Himself a Lamb (vv. 13, 14).

Just behind Abraham was a ram caught in a thicket by his horns. Him Abraham offered instead of his son. In the words "God will provide himself. a lamb (v. 8) we have the whole plan of redemption outlined. God has provided the costly sacrifice of his Son to none of them fussy. With the supply broadcloth, in their gray with satisfy himself.

He who has no taste for order will be often wrong in his judgment and seldom considerate or conscientious in his actions.-Lavater.

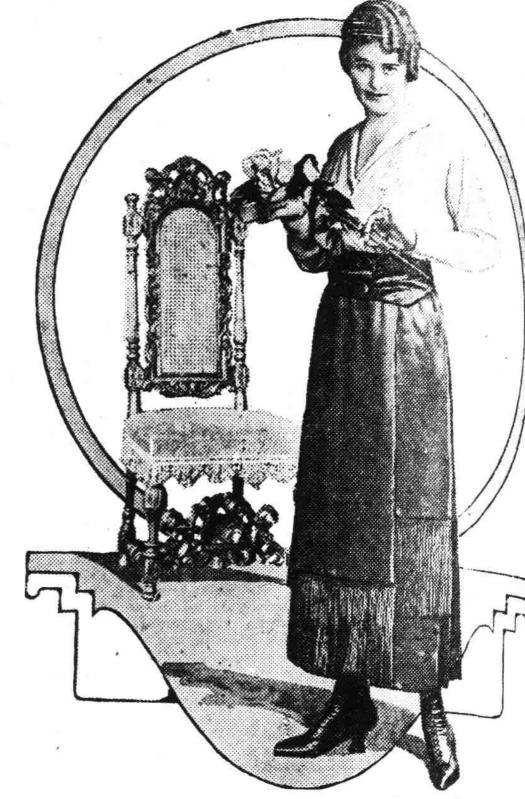

### Value of the Bible.

The Bible is to us what the star was to the wise men; but if we spend all our time in gazing upon it, observing its motions, and admiring its splendor and are not led to Christ by it, the use of it will be lost to us.-T. Adams,

Truths From on High. All human discoveries seem to be made only for the purpose of confirming more and more strongly the truths that come from on high and are contained in the sacred writings.-Her-
