Health Shown by Finger Nails. The rapidity of the growth of the nails is indicative of the health. The growth of the nails on the right hand is in most people more rapid than those on the left hand. Another curious point is that the rate of growth of the nail depends directly on the length of the finger. Thus the nails on the two middle fingers of man grow more rapidly than those on the first and fourth fingers respectively, and these in turn are more speedily grown than those on the little fingers.
