To the Farmers of Polk County. We will work with you; if you Polk County in perfectly order will work with us.

We want to give you an outline of the scope of work we are aiming for this year in Polk County. 1st. Agronomy, or fields and field crops. We want one more farmer in each township to begin now and do of this crop to plant.

In addition to the foregoing; we desire to organize a community Club in every township in the county. This community Club should so organize that it car look after and see that the best methods of educational and social as well as economic de velopment will come to the community. What is known now as club work is an entirely different thing. The Commun ity Club, should get behind and boost all club work withir its territory. world to live. In order to do this; let every one see to it that he or she will do his or her part, by keeping himself misbehavior of any kind against his neighbor. Christmas and the holidays passed in ly manner. Why not every day in 1923 be a perfect day. Johnston County Tenn., I am informed, has rented her jail for a work shop there is such little use for a jail. Why not Polk county behave themselves in such a way that we could abolish the jail entirely? It can be done; if we will, it will be done. In closing let me appeal to the very best there is in every man and woman in Polk County to stand with and by us through this year in all our plans for County betterment, and we will go forward this year as never before. I have great faith in Polk Couty people and therefore I have that inner consciousness which I cannot explain that the future is pregnant with good and it oncooperate with the Laws and mighty blessings and prosperity, will be ours.
