Skill in Flattery

There is an oblique way of reproach
which takes off the sharpness of it,
and an address in flattery which makes
it agreeable, though never so gross;
but of all flatterers the most skillful
is he who can do what you like without
saying anything which argues he does
it for your sake.

Europe's Coast Line

Islands constitute about one-twenty
fifth of the area of Europe. Europe's
coast line is relatively greater than
that of any other continent, and the
numerous indentations of the coast
give Europe its commercial su-
premaccy.
