Where Name Gamaliele Occurs in the Bible

Two men by the name of Gamaliele are spoken of in the Bible. The periods in which they lived were widely separated. The name of the first is found in Numbers 1:10. He was the son of Pedahazur, a prince or captain of the Tribe of Manasseh, and he is here mentioned in connection with the census of Sinai. He again mentioned in chapters 2:20; 7:54 and 10:23, the latter reference being to Gamaliele as captain of the Tribe of Manasseh at the starting of the Israelites on their march through the wilderness. The second Gamaliele was a Pharisee and celebrated doctor of the law, who gave sound worldly advice to the Sanhedrin respecting the treatment of the followers of our Lord. This will be found in Acts 5:34. It is also learned from 22:3 that he was the teacher of St. Paul when the latter was a young man zealously devoted to Judaism. He is generally identified with the very celebrated Jewish doctor, Gamaliele, who was the son of Rabbi Simeon, and grandson of the celebrated Hillel. He was president of the Sanhedrin, the great council of the Jews, during the reigns of the Roman emperors Tiberius, Caligula and Claudius.

Science Vainly Seeks New Sources of Silk

In spite of the enormous increase in the production of artificial silk, real silkworm silk is just as much sought after as ever, and is even more expensive than formerly. So much so that attempts have been made to find other insects to produce it. Spiders have been tried, and other caterpillars besides that of the silkworm moth, but without much success. The oddest source from which silk has been obtained is a shellfish, a sort of mussel, called the "pinna" and found in the Mediterranean. This creature fastens itself to the rocks with fine and very strong threads, which can be spun into lovely, golden yellow silk. But it is not likely that sea silk will ever be a commercial proposition. The thread is very short, the filaments being not more than three inches long. Also, it takes more than three thousand of the fish to produce one pound of silk. Yet a little is produced and worked in Sicilian, coast villages.

How to Soften Fur Rug

If a fur rug has stiffened after being washed, it can be softened by applying the following mixture to the wrong side of the rug: Three table-spoonfuls of castor oil, one of glycerine and one of turpentine. This must remain on for a week, when the rug, still on the wrong side, should be well rubbed with a smooth stone or block of wood.
