

AGRICULTURAL NEWS

EGG MAKING
 The results in a series of experiments with a pen of pullets, on free range, which did not get meat scrap or any other animal-protein feed, laid only 90 eggs each in a year, compared with yields of from 125 to 150 eggs from pens fed rations containing meat scrap. Fish meal or fish scrap can be used to replace the meat scrap and compares favorably with a good grade of meat scrap containing the same percent of protein.
 Skim milk or buttermilk, either sweet or sour, is excellent for replac-

ing part or all of the meat scrap. The milk may be used in mixing the mash if a moist mash is fed, or it can be kept before the fowls as drink. If clabbered and fed thick or like cheese, hens will eat enough of it to replace all the meat scrap needed.
 If table scraps and cooked vegetables are used, it may be possible to reduce the amount of the meat fed from one-third to one-half, depending on the quantity of meat products in the scraps. Feed scratch mixture twice daily

preferably in litter from 3 to 5 inches deep on the floor of the henhouse, using about one-third of the daily allowance in the morning and the remainder in the afternoon. A mash may be fed either dry or moist, the dry form being commonly used. The mash should not be sloppy.

CUSTARD
 A custard should be cooked in a double boiler and stirred almost constantly.

MITE KILLERS
 Chicken mites may be eradicated by a few thorough applications of Kerosene or some of the coal-tar products sold for this purpose, or crude petroleum to the interior of the poultry house, including the floor taking care to get the material into the cracks.

TIN CAN NOT DANGEROUS
 The prevailing idea that it is necessary to remove food products from cans as soon as they are opened is erroneous. For a reasonable period incident to its utilization it would be safe to allow the food to remain in the can. Transferring to another receptacle only adds to the danger of contamination.

What Are You Going To Do About It?

Sunday will soon be here. It comes every week just as it came in your childhood.
 The bells will ring, the organ will make music, people will gather for devotions. Thus it will be in Tryon, and thus it will be throughout Christendom—not merely this week, but on every Sabbath to the end of your life.
 Why?
 Here is a force that persists—that surrounds you. The point is that it is here, present, living.
 You cannot possibly ignore it.
 What are you going to do about it?
 Let's go! When? Next Sunday. Where? To Church.
 Which Church? The Church of your preference.

BAPTIST
 Regular services each Sunday 11 a. m. and 8 p. m.
 Special music evening services.
 Sabbath School 10 a. m.
 Public cordially invited.
 THOMAS L. JUSTICE, Pastor.

CATHOLIC
 St. John's Church, corner Melrose avenue and Lanier street.
 Mass—Sunday 8:30 a. m.
 REV. J. A. MANLEY, Rector.

CHURCH OF THE HOLY CROSS
 (Episcopal)
 REV. C. P. BURNETT, Rector.
 Sunday Services;
 Holy Communion 7:30 a. m.
 Sunday School 10 a. m.
 Morning Prayer & Sermon 11 a. m.
 Friday, Litany 5 a. m.
 All Are Cordially Invited to these services.

METHODIST
 First and Third Sundays 11 a. m.
 Second and Fourth Sundays 7:30 p. m.
 REV. P. E. PARKER, Pastor.

PRESBYTERIAN
 Tryon—Second and Fourth Sundays each month 11 a. m.; First and Third Sundays 8:00 p. m.
 Columbus—First and Third Sundays 11 a. m.; Second and Fourth Sundays 8:00 p. m.
 REV. S. WILKES DENDY, Pastor.

ERSKINE MEMORIAL
 (Congregational)
 Rev. Will B. O'Neill, Minister.
 Sunday—Church School at 9:45 a. m.
 Morning Worship at 11 O'clock.
 A graded school with classes for all.
 Wednesday—"Quiet Hour" 4:30 p. m.
 A friendly welcome awaits you.

Surprisingly Low Prices on Quality Clothes

Never in the history of the tailoring business have men been able to buy quality clothes—made-to-measure—at the low prices we are now offering.
 M. BORN & COMPANY are celebrating their Golden Anniversary by giving unparalleled values.
 The complete line of Fall and Winter Fabrics and Styles is here. Come in and inspect the wide selection of the latest weaves and colorings—the snappy styles—and remember, BORN'S guarantee of complete satisfaction is worth 100 cents on the dollar, and we are here to back it up—ALWAYS.

RALEIGH, N. C., Sept. 9—Planting rye as a winter cover crop in North Carolina has been argued with vehemence by the soil and fertility workers of the State. Now come the livestock folks adding the weight of argument in favor of the crop and claiming that rye is a most excellent crop for early spring grazing.
 "It's a general practice to turn our cows on pasture too early in the spring," says John A. Arrey, dairy extension specialist. "This is generally because we have an inadequate supply of winter feed. By the last of March the barn loft is empty and man dairymen turn their cows on pasture rather than buy hay. This is not such an economical practice because the early grass is mostly water and contains little nutritive value. In addition, the sod is trampled and will be injured for the entire summer if the pasture is heavily grazed while the land is soaking wet. This is especially true of red lands. Not only are the sod and the soil damaged by such grazing but weeds and buds are consumed by the cows causing all kinds of flavors in the milk and butter."
 Mr. Arrey states that he knows of one creamery in North Carolina that lost \$1,200 on one lot of butter which had to be consigned this spring for cooking purposes on account of the weedy flavors which the butter contained. Such a loss as this is, of course, borne by the milk producer and could be largely avoided by not turning the cows on pasture until there is sufficient grass to satisfy the appetite of the cows to the extent that she will not eat objectionable weeds.
 Rye planted in September, states Mr. Arrey provide excellent spring grazing at low cost and will help to solve the problem of empty barn lofts. By utting the cows on the rye, they may be held off the pasture until the grasses have an opportunity to grow.

RALEIGH, N. C. Sep. 9—Beauce many farmers in eastern Carolina have had difficulty in getting their lands inoculated for vetch, it might be best for them to start with one acre planted to the crop, especially where the soil is very sandy.
 "Some of our most progressive growers in eastern Carolina have found this plan of thoroughly inoculating one acre and then using the soil to inoculate a greater acreage later, to be the most effective method of getting a start with vetch," says E. C. Blair, extension agrono-

mist at State College. "This acre needs to be well disced and ready for planting by October first. If the land is acid, it should be limed and if it is poor, an application of from 300 to 400 pounds per acre of a 10-24 fertilizer ought to be broadcasted over the soil and harrowed in. The next step is to take about 300 pounds of soil from a field known to be inoculated for vetch, taking the soil from one to six inches below the surface. Mix 25 pounds of vetch seed with this soil and if possible sow the mixture of seed and soil with a grain drill, using the fertilizer sprouts. At the same time, drill in one bushel of Abruzzi rye from the seed box."
 Mr. Blair states that if no grain drill is available, the rye might be broadcast while the vetch and soil can be sown with a lime spreader and all harrowed in at one operation. A fertilizer distributor could be used if there is a lime spreader on the place. If only partial success had with the vetch the first year, the same acre should be planted again, states Mr. Blair, without inoculating the soil at the second planting.
 Once the first acre is established, it will supply inoculation for the entire farm and when once the land is thoroughly inoculated, all one needs to do to get a good stand of vetch is to plant about 15 to 20 pounds of seed per acre each year.

The 150 farmers who made a tour of their home county now have a better idea of the different kinds of farming being conducted successfully in Alamance County, says Kerr Soott, county agent.

NOTICE OF SERVICE OF SUMMONS BY PUBLICATION IN SUPERIOR COURT NORTH CAROLINA, POLK COUNTY
 Manufacturers' Power Company a Corporation
 —vs—
 Dennis McMurray and wife, Allie McMurray Clifton McMurray and Maude McMurray, minors.
 The defendant, Dennis McMurray, will take notice that an action entitled as above has been commenced in the Superior Court of Polk County, North Carolina for the purpose of procuring an Order of Sale for partition of the following described lands:
 Lying and being in the County of Polk and State of North Carolina, bounded as follows: BEGINNING at two sourwoods and running thence N. 40 w. to Sarah Bradley's line; thence with her line to the Speculation line; thence S. 40 W. to Hiram Branch; thence down said branch to Jasper Henderson's line; thence N. 40 E. to the BEGINNING, and containing 70 acres, more or less. Being the same tract of land conveyed by Thornton Bradley and wife to T. P. Alewine by deed dated the 29th day of July a. d. 1884, and recorded in Book 7, page 80 of the Records of Polk County, and being land described in deed from T. P. Alewine and wife, Margaret Alewine to John McMurray and Sherman McMurray, dated February 1891, and of record in Book 45, page 270 of the Records of Deeds for Polk County, North Carolina.
 And the said defendant will further take notice that he is required to appear at the office of the Clerk of Superior Court of said County at the Court House in Columbus, N. C. on 20 day of September 1926, and answer or demur to the petition now on file in said action or said plaintiff will apply to court for the relief demanded in said petition.
 This 16 day of August, 1926.
 H. H. CARSON,
 Clerk Superior Court Polk County.
