Tuxedo Builds Strong Colts

Specialists proclaim that what you feed babies in the early years determines the kind of health they'll have in after life. This is just as true of colts. Feed happily and the result will be a weak-kneed animal. Feed Tuxedo Chop and the youngster grows into a worker who earns his keep and a good profit besides. Better colts are bred if the mare eats Tuxedo Chop regularly. Breed them and feed Tuxedo Chop the year 'round. We recommend it for the best results.

SUCCESSFUL BUSINESS MAN BUYS HOME AT LAKE LANIER

N. B. Jackson Makes it His Selection

Recently one of Tryon's successful young business men who owns the Home Ice Plant of this City, purchased a nice home at Lake Lanier, and in a few days he expects to move into his property. Mr. Jackson states that he has always appreciated the location as a very desirable one for a home, and during the last two years has been studying it with that intention in mind. The Lake Lanier News considers Mr. Jackson's selection at least a complimentary one, because he has lived in this vicinity for many years, and is quite familiar with every location available, for a home site in this country.

For several years he was connected with the Underwood Typewriter Company, but returned to Tryon around the year 1922, starting the Ice Plant, and Laundry on a small scale. By very successful and efficient management he built up a very satisfactory business. The rapid growth of the city soon exhausted the capacity of the smaller plant, and this year Mr. Jackson built a very large and modern plant of twenty five ton capacity, housing it in a new and modern building, erected particularly for that kind of business. The new laundry which was connected with it, and a part of the Company having recently been sold to Mr. Rector of Virginia.

This new property owner at Lake Lanier is now making plans to further improve and beautify its property, and we are glad to welcome him as one of our neighbors.
