

# THE NEW 1936 General Electric Refrigerators

Now Ready For Your  
Inspection

The sooner you have your G-E Refrigerator in your kitchen the sooner you will begin saving about \$10 a month on your food budget. G-E Refrigerators are powered with the famous sealed-in-steel mechanism that now gives "DOUBLE THE COLD" AND USES 40% LESS CURRENT.

As Little As \$10 Down and  
30 Months To Pay

### Reddy Kilowatt Remarks:

Although the price of living has gone up in the last few years, you can still save money by having a G. E. in your kitchen, by saving on week-end specials and letting me save the left-overs.

# Proof of Ford V-8 Economy

MOVE up to high-priced car performance—without the extra cost! The thrill of driving a Ford V-8 can be matched only in cars costing hundreds of dollars more. The Ford V-8 is responsive. It picks up more easily. At all speeds you get the smooth, effortless flow of power which means truly fine car performance.

—And in a Ford V-8 you get this performance at less cost. In bringing the V-8 to the low price field, Ford designed an engine, which with the dual downdraft carburetor, simply takes the gas used by a "4" of similar size and splits it into eight equal charges. In fact, the Ford V-8 with its sparkling performance and 8 cylinder smoothness is the most economical car Ford ever built. Definite cost records of large passenger car fleet owners show actual savings in the operation of the Ford V-8 over previous Ford models.

Test this great car yourself. Get behind the wheel and drive it. Feel the thrill of modern V-8 performance. Then, remember, that it's overall economy is greater than those famous Ford models of past days. Your Ford Dealer
