

Cavaliers Lose To Wilmington Team

Local Squad Puts Up Commandable Fight Against New Hanover High Here

Fighting against a team of all-state and near all-state football players, the Clement Cavaliers held New Hanover high school to a score of 13-0 in a football game here yesterday afternoon. The score is a slight indication of the game, which was marked at all times by the game play of the little and light Cavaliers. Coming twice into scoring territory, the local squad did not have weight sufficient to get over a tally, but in the playing field they were outstanding.

In attempting to get over this defeat, even then a moral victory, the local team will play Burgaw high school there tomorrow afternoon.

Tight-Eye Wood, Cavalier signal calling half, was easily the outstanding man on the local field and showed up well against Dudley Mote, New Hanover's all-state star of last year. On a triple reverse from his 30-yard line, Tight-Eye twisted and squirmed for 40 yards in paving the way for a possible Cavalier touchdown in the third quarter, and he threw a pass to Earl Ezzell for a gain of 28 yards, placing the ball on the one-yard line. This was the nearest to a score the local team came, and three line plays and an attempted pass failed to make the tally.

The other chance for a score came when Tight-Eye flung a pass to Pill Roller Miller, diminutive halfback, for a 20-yard gain. Here, too, the New Hanover forward wall was too strong and heavy.

CHEVROLET SALES PASS ALL PREVIOUS RECORDS

Sales of Chevrolet passenger cars and trucks have broken all records for any similar period in the history of the company, W. E. Holler, vice president and general sales manager, announced this week. Deliveries of 1936 models at

retail through August totaled 1,045,440 units, Mr. Holler said. This is 326,927 more than were delivered in the corresponding period following the announcement of 1935 models, and exceeds the record for the same period, in the all-time high year of 1929, by 116,760 units.

Keeping up with the demand which resulted in this high volume, production set a new high mark for eight consecutive months, turning out 1,000,000 cars and trucks in one day over that period.

SCHOOL TEACHERS GET THEIR CHECKS ON TIME

The majority of school teachers in this county were wearing broad smiles this week as they finished the first month's work and received their vouchers. Some schools have not yet completed their first month and teachers in these will have to forego the pleasure of a shopping trip another few days. Vouchers for the first month are being made up under the old schedule, Supt. Johnson stated, due to the fact that the new schedule for pay has not yet been released by the School Commission. When the new schedule is received vouchers will be prepared according to it and will include amounts due on the first month.

LARGEST ENROLLMENT AT W. C. U. N. C. SINCE HOOVER

Greensboro, Sept. 22.—Enrollment at the Woman's College of the University of North Carolina has reached 1,755, according to an announcement by Dr. W. C. Jackson, dean of administration. This is the largest enrollment since 1929-30 when 1,888 students were registered. At the present time practically every room in the college dormitories is assigned. Last year's enrollment was 1,573. The preceding year it had been 1,326. The commercial class this year was limited to 240, and that quota was reached several weeks ago, a number of late applicants being turned away because there were no vacancies.

The present enrollment of 1,755 represents 97 of the 100 counties of the State.

OFFERINGS PICK UP ON LOCAL TOBACCO MART

A considerable increase in the number of pounds of tobacco offered on the local market has been noted here during the past few days as the market entered the fourth week of the current selling season. Heavy breaks were in evidence here Friday and again Monday. Tuesday's and Wednesday's sales, while not quite as heavy as Monday's, were considerably better than during the early season and every indication now points to one of the most successful seasons for the local market in several years.

Prices on practically every sale since the market opened on September first have been very satisfactory, particularly during the past two weeks when an increased demand sent prices soaring on medium and better grades. It has not been an uncommon sight during the past two weeks to see farmers averaging from 35 to 45 cents on their entire offerings.

Of interest to growers throughout this section is the announcement that J. D. Rogers is now associated with W. M. Britton in the operation of the Brick Warehouse. Rogers is well known throughout this section, having operated the Brick house for a number of years prior to the time Britton leased it.

Select Chairmen For Amendment

Two Lawyers From Sixth District Picked to Campaign For Court Change

The appointment of district campaign chairmen for all of the 20 judicial districts of the State was announced yesterday by Charles G. Rose, chairman of the North Carolina Bar Association committee on the amendment increasing the membership of the Supreme Court. The joint committee of the association and the North Carolina State Bar will be assisted by the district committees in the campaign to inform the electorate on the need for adding two more members to the State's highest court.

Asking for a non-partisan campaign, a Democrat and a Republican will head each of the district committees. The Democratic member from this, the sixth judicial district, is John D. Warlick, Jacksonville, while the Republican member is W. H. Fisher, Clinton.

COLORED FARMERS ATTEND INSTITUTE

ed by S. C. Anderson, Pender County Training School, a Watha quartet won first prize, and the Rocky Point Training School won second place.

Exhibits available at the Field Day were opened to colored visitors.

SECURITIES BILL SUPPLIES DUPLIN WITH HEALTH AID

(Continued from Page One)

Inauguration of such an office is expected to result in inestimable development of the sanitary conditions in this county, particularly in the matter of cafes and public eating establishments. The most recent inspection of cafes in Duplin showed that grade "A" cafes were almost totally unknown.

Duplin Ranks In Milk Production

Production of 809,845 Pounds of Milk Reported From 10,977 Farms

Milk produced on North Carolina farms in 1934 totaled 138,121,337 gallons, according to a special report of the 1935 Federal Farm Census released recently by Director William L. Austin of the Bureau of Commerce. The number of cows milked increased from 268,373 in 1929 to 352,782 in 1934. Buncombe and Guilford were the two leading counties in the state in 1934 in the number of cows milked and the production of milk.

Milk was produced on 64.5 percent of all the farms in the state in 1934 as compared with 54.6 percent in 1929. Butter churned on farms in 1934 totaled 30,716,616 pounds and was reported on 183,740, or 61 percent of all the farms in the state.

In 1934 1,977 Duplin farms reported 2,592 cows being milked, producing 809,845 gallons. A total of 169,333 pounds of butter churned was reported by 1,713 farms.

The report on Pender county stated that in 1934 a total of 869 farms reported 1,571 cows were milked, producing 511,961 gallons of milk. In the same year 746 farms reported 79,973 pounds of butter were churned for a great increase over the 1929 figure of 33,431.

The Onslow report showed that in 1934, 631 farms reported 806 cows being milked and producing a total of 219,218 gallons of milk. In the same year 565 farms stated that 45,323 pounds of butter were churned, as compared with the 1929 figure of only 19,148 pounds.

LOCAL FISHERMEN GET BIG HAULS THIS WEEK

Whilst the hurricane of last week brought an unprecedented run of blue fish into North Carolina waters, numerous fishermen from this section oiled their rods and reels and took advantage of the situation, and no matter how green the fishermen, all reported astounding catches.

Among those returning with tall tales of their prowess were W. D. Campbell and Robert Carr, local men, who said their party caught approximately 350 blues in one day's fishing at Topsail Sound. Carlyle Williams and Lawrence Cavanaugh reeled in 75 and Jimmie Moore and Frank Byrd caught 72 blues along with three drum,

one weighing 20 pounds.

Anyone could catch fish under such circumstances, the local men stated, for with every drop of a line at least one or two finny creatures were hung. In other words, there were more fish than you could shake a stick at.

TOBACCO TRUCK PROVES INJURIOUS TO FARRIOR

Rose Hill, Sept. 22.—While loading tobacco on a truck near his home Monday afternoon Ward Farrior fell and broke his collar bone and was carried to a Wilmington hospital for examination. Although his injuries are not serious, it was reported that he would be confined for some time.

Counties Sponsor Welfare Machine

Twenty-Five Departments Organized During Year; Total of 79 In State

Onslow and Pender are among the 79 counties in North Carolina with organized public welfare departments, Mrs. W. T. Bost, Commissioner of Public Welfare, has announced. Twenty-five have been organized during the past year, for the largest increase since 1920, Mrs. W. B. Aycock, director of county organization, added.

The newly organized counties and superintendents elected include, Pender, Miss Viola Scott; Onslow, Miss Laura Matthews.

School Openings Encourage Trade

Cool Weather Aids Buying of Fall Goods; Industrial Employment Rises

Weather conditions and the opening of schools were the factors which more than anything else seemed to determine the trend of retail trade throughout the country during the mid-September period. In substantially all cities making reports to the Department of Commerce good gains over the same period last year were recorded, but there were numerous fluctuations compared with the period immediately following Labor Day. Wherever the weather turned cool heavy buying of Fall goods ensued but in trade areas where the hot weather was prolonged there was considerable slowing down in turnover. Wholesale trade throughout the country generally made encouraging reports and it was noted that the buying of holiday goods on a large scale had already set in.

The reports were featured by considerable increases in employment. Michigan industrial employment in August was 4 percent ahead of August last year while payrolls showed a gain of 20 percent. Los Angeles reported that almost 30,000 persons were placed in jobs in all branches of industry in California during August. From Louisville came the report that the rise in employment was widespread with the production of machine tools in the heavy goods industries increasing. Thirty leading industrial firms in Memphis reported business 32 percent better so far this year than last while in Nashville industrial employment was said to be exceeding peak years with 110 more industrial establishments than last year. During August more than 1,000 persons were placed in private employment by the Delaware Reemployment Service. In numerous other cities moderate gains in employment were noted.

Agricultural conditions generally over the country were

improved due to rains, although in the Cincinnati area fear was expressed as to the outlook.

The labor situation in Minneapolis, Portland, Oregon, San Francisco, and Seattle was unsettled. In Minneapolis, the strike of mill workers and terminal elevator employees continued with all mills closed and all elevator facilities inoperative. Notwithstanding this fact Minneapolis industrial employment was reported to have increased 10 percent over the last 2 weeks period. Strikes, including truck drivers, iron molders, and flour-mill employees, continued in Portland. In San Francisco the waterfront labor situation was quiet but developments after the termination of working agreements at the end of this month were regarded with uncertainty.
