**Change today** Right you are. The weather hasn't made up its mind yet. But you don't care, once Conoco Germ Processed oil—patented—is Oil-Plating your engine for Winter.

Change to modern Oil-Plating today, for instance. Then every cylinder, piston, bearing and other part is completely Oil-Plated.

And today... tomorrow... next month... as long as you use Germ Processed, this Oil-Plating will still be up there. It gets there by means of the special "hyper-oily concentrate" which is alloyed into Germ Processed oil under patents. In circulating, this oil renews its genuine Oil-Plating, which doesn't return to the crankcase, but stays up all through your engine.

Thus the old cry of "get your right Winter viscosity" isn't the half of it, now that you can get exclusive Oil-Plating, too—a great big extra. Oil-Plating is all ready to lubricate before your starter even turns, and that lets your battery live. Oil-Plating doesn't run off in any weather, and that saves your engine and oil. You keep away from your next quart—your next battery—your next car, by changing today to Conoco Germ Processed oil. Continental Oil Company
