Friends of Mr. Sylter here are sorry to learn of his illness in James Walker hospital, Wilmington, and wish him a speedy recovery.

### TIME TO PLANT FALL GARDENS

Farm families who wish to enter the fall and winter garden contest sponsored by the State College extension service are urged to start planting their gardens as soon as possible.

The first step recommended by extension specialists is that of preparing the soil and supplying it with plenty of stable manure or other organic matter.

Among the vegetables that may be planted in August are: Broccoli, mustard, Swiss chard, endive, lettuce, cauliflower, cabbage, turnips, carrots, beets, celery, snap beans, lima beans, sugar corn, and tomatoes.

Broccoli, cauliflower, and Chinese cabbage may be planted in hills 15 inches apart, or the seed may be sown in plant beds and transplanted later.

Side dress the plants with nitrate of soda three to four weeks after transplanting.

Sow celery in plant beds and cover with burlap or heavy paper, but remove the covering as soon as plants appear above ground. Transplant to field 6 to 8 weeks later. Set plants in double rows 6 to 8 inches apart. Celery will not mature in acid soil. Wood ashes or hydrated lime broadcast over the soil a month before plants are transplanted will aid in maturing the celery.

### NOTICE OF SALE

### HOW THE MIND INFLUENCES OUR BODY.

Bad mental habits may cause stomach trouble, arthritis or heart disease. Faith may help in stopping the growth of cancer or curing a rattlesnake bite. Read this unusual and instructive article in the American Weekly with Sunday's WASHINGTON HERALD.
