

Sunday—

(Continued From Page 3)  
 to his Jewish audience. The sermon produced a powerful effect. The success of a missionary caused the hostility of the Jews

and their influence led to the missionaries having to leave the city.  
 Travelling to the southeast, Paul and Barnabas came to Iconium, where their experience at Antioch was repeated. To avoid the violence of their opponents

#### Controlling Peach Tree Borer

The peach tree borer causes severe damage in peach trees in this area. The gummy secretion from the trunk of the tree is caused by this insect. They can be controlled by applying Ethylene Dichloride Emulsion during the Fall and Spring. In this area the application may be used in warm periods during the Winter. Best results are obtained in the Fall at the end of the egg-laying period of the peach borer moths, when most of the borers are small.

No preparation of the soil before treatment is necessary on loose, level ground. In some cases, however, cupping the soil slightly toward the tree trunk to prevent the liquid from running off, or loosening the soil around the tree to permit the liquid to be readily absorbed gives better results.

The material should be applied by pouring it on the soil around the base of the tree in such a way that the soil will absorb and hold it around the tree at the ground line. It should not be poured on the trunk. The amount applied should be regulated carefully since applications

the party proceeded to Lystra and preached to the people there in the open air. Paul's miraculous healing of a local cripple caused the inhabitants to think they were gods and desired to worship them, which Paul prevented. Here, once again, hostility was engendered by the Jews and the people, who shortly before wanted to worship them, turned against them and stoned Paul.

much in excess of the suggested dosage may cause tree injury. On the package the amount for different size and ages of trees

is given. After the chemical has been applied several shovelfuls of soil should be placed around the tree to prevent evaporation from the surface. The tree needs no further attention.

#### ADMINISTRATOR'S NOTICE
