Tobacco Sales Have Changed, Says Blanchard

"If you told young people today about how tobacco sales were conducted in the old days they would not believe you," said a pioneer in the tobacco profession, O. C. Blanchard, Sr., said recently.

Mr. Blanchard, who with William Farrior and his son, O. C. Blanchard, Jr., Tyson Lanier and R. H. Lanier, operated the oldest tobacco warehouse in Wallace, says today's sales are quite different from those of earlier Wallace days.

"Everything moves so much faster nowadays," says Mr. Blanchard, who is a veteran of 32 years in the tobacco field. "It used to take all day to sell 150,000 pounds," the experienced warehouseman stated. "Now, you can sell that much in an hour."

Mr. Blanchard says this speeding up became necessary as more and more tobacco was produced in the area to be sold here. He credits today's faster sales to improved machinery for weighing and moving tobacco, as well as new modern warehouses much larger than the old ones.

You don't have to stop during the sale and move the tobacco off, then put more out to be sold now, he says. Now, warehouses hold as much as can be sold in a selling day.

Mr. Blanchard will be operating this year in his fourth warehouse. Up until 1926, Blanchard - Farrior was located across the railroad in

Wallace, moving across town in that year to the lot where The Enterprise is now located.

In 1946, this building burned and when the operators rebuilt they located on Highway 117 just out of Wallace. Bad luck struck for the second time last October when Hurricane Hazel raged through town,

destroying the building. This year, Blanchard - Farrior sales will be conducted from their new building constructed on the site of the former one.
