## The lamp behind the neon

BEHIND THE LIGHTED SIGN of the modern American pharmacy there burns a lamp as old as history itself—the lamp of learning.

For today's pharmacist is a man of long and specialized training. To get his college degree, he must have a broad and exact knowledge of the many technical sciences associated with the action, handling and dispensing of drugs, chemicals, biological products and other medicinal agents.

He must pass rigid State examinations to become a licensed pharmacist.

Then, like your doctor, he must keep abreast of the latest medical developments, the newest drugs, and the constant improvement in pharmaceutical products.

The shelves of his pharmacy are stocked with the newest discoveries of medical science and an array of bright, attractive merchandise that go to make today's drug store a center of service in its community.

Get better acquainted with your pharmacist. Trade with him—he's a man you can rely on.—Reprinted from a copyrighted advertisement published by Parke, Davis & Company, Detroit 32, Michigan.
