Audit Will Be Presented

An audit of Beaufort's books will be completed this week and presented to Beaufort commissioners at their meeting Sept. 11, City Clerk Dan Walker stated yesterday. He said the town board would not meet on its regularly scheduled date, Sept. 4, because of the Labor Day holiday.

Fire Station Painted

Beaufort firemen completed several days ago the painting of interior and exterior of the fire station.

Teachers to Meet At Beaufort Today

Carteret county elementary teachers will meet at 9 o'clock tomorrow morning in Beaufort school auditorium. Theme of the meeting will be "Improvement of Reading." Fred G. Lewis, teacher supervisor, announced today.

Registration will begin at 9 a.m., followed by a brief talk on the purpose of the conference by Mr. Lewis. H. L. Joslyn, superintendent of schools, will introduce new teachers and then a movie, "Teacher and Pupils Planning and Working Together," will be shown.

Group meetings will begin at 10:30 and continue until noon. Teachers of grades one and two will study "Reading Readiness" under the supervision of Mr. Lewis. Miss Susan Rumley will lead teachers of grades three and four in "A Reading Program for the Dull-Normal Child."

Mrs. Mildred Lawrence will conduct the sectional meeting on "The Slow-Learning Reader" for teachers of grades five and six and Mrs. Johi Nelson will be in charge of the topic "Learn to Read," which will be presented to teachers of grades six and seven.

Carteret county principals will meet with Mr. Joslyn at 9:30 this morning in the Beaufort school.

Cancer

(continued from page one)

from the cancer society last year was \$414.97. This was a per centage of the 1949 campaign funds collected here and has been used to pay for treatment to indigent cancer patients and to pay for transportation of patients to medical centers.

These funds are administered by Mrs. McNeill in conjunction with the county welfare department.

In announcing the close of the cancer society's fiscal year Thursday and the ending of the cancer campaign, Mrs. McNeill stated also that persons knowing of cancer cases which need assistance, should contact her. Phone 6-4394.

Through the local cancer unit, transportation can also be arranged for taking patients to Kinston, Goldsboro, and Duke hospital, Durham.

Information in regard to solicitation of cancer funds was recently received by Mrs. McNeill from state headquarters. The National Cancer Hospital of America, Detroit, Mich., has undertaken a campaign to raise \$5,000,000 but the American Cancer society has announced that the hospital is not a project of the American Cancer society or any of its divisions, nor is it sponsored by the American Cancer society.

Serves in Mediterranean

Participating in a second phase of Mediterranean exercises held by the United States and British Mediterranean Fleets is the radar picket destroyer USS Vesole of which Joseph Berlando, boatswain's mate, third class, USN, husband of Mrs. Margaret E. Berlando of Beaufort, is a crew member.

Collisions

(continued from page one)

Harold W. McCabe of Newport, who was directly behind Hauser, did not see the signal and ran into the left rear fender of Hauser's car, according to Officers Newsom and Bowles who again investigated.

Saturday at 2:30 p.m. Bonnie M. Rice, who had been parked in front of his house at 408 Arendell st. pulled out from in front of the house into the line of traffic. As he reached the intersection of 5th and Arendell st. he made a left turn without making a hand signal, according to Gladys W. Cronk, Beaufort RFD, who was following behind Rice.

Miss Cronk told police she was not prepared to stop when he turned in front of her and her car car struck the left rear fender of his car. Officer Edmond Willis investigated.

Sunday morning at 11:45 there was another accident near the intersection of 20th and Bridges st.

Harold R. Morris of Newport, driving a 1947 Ford convertible, was driving on Bridges when his hand slipped on the steering wheel. Morris' car swerved to the side and struck the parked car of Clyde E. Willis. Owners of the two cars went to the police station and reported the accident.

Tide Water Employees See Safety Demonstration

The importance of taking proper precautions while driving was demonstrated to Tide Water Power company workers Friday morning by C. H. McAllister, Tide Water safety director, in one of his monthly safety talks to local employees of the power company.

Using special demonstration equipment on 5th street between Arendell and Bridges, McAllister showed that it takes approximately 26 feet to stop a car moving at 20 miles an hour and also showed how the car will travel approximately 20 feet before the driver reacts to any sudden danger and applies the brakes.

McAllister said he hoped vehicle drivers for the company would profit from the demonstration. He urged that they keep their proper distance when following behind other vehicles. Prior to the demonstration the safety director gave a brief talk, using visual aids, on other safety measures.

Detection Center Re-Opens

The cancer detection and diagnostic center, Kinston, re-opened Thursday after a three-week vacation period. Twenty-two persons, 14 white women, three white men and five colored women, appeared for examination. Twelve were referred to their physicians for medical attention.

Firemen Called

Beaufort firemen were called to the apartment of Earl Williams, Front st. extension, at 6 p.m. Sunday when the oil burner on a hot water heater flared up, endangering the apartment. No actual fire was caused. Firemen turned the burner down upon arrival and then returned to the station.

Gas was injected into the depleted Brennemam oil field in West Virginia, recovering 457,000 barrels of oil.

Five Morehead Firms Operate For 50 Years

Five firms in Morehead City have been in continuous operation for the past five decades, or more.

Three of these organizations are engaged in the processing of menhaden and the other two in retail trade.

Charles S. Wallace, the founder of Wallace Fisheries in Morehead City, started in the pogie business just prior to 1900. Prior to that time he was active for some years in the retail fresh fish business. His son, George R. Wallace, is now head of the firm. His activities have expanded from Morehead City to include a similar operation in Florida and two others in Louisiana.

Robt. W. Taylor, sr., likewise started in the fish business in Carteret county around 1889. This bus-

ness has remained intact during the years and is now represented by two distinct organizations, R. W. Taylor & Co., operated by Robert W. Taylor, jr., and the Carteret Fish and Oil company, operated by another son of the original founder, J. Clarence Taylor.

Just before the turn of the twentieth century R. T. Willis opened a general merchandise emporium. Mr. Willis is still in business in Morehead City, although not in his original location, and is still one of the leading general merchants in Carteret county. Two sons learned about business at their father's side. One is still in the firm of R. T. Willis & Sons. The other operates the Willis Auto Supply company in the adjoining location.

D. M. Webb was another who began business here before 1900. For well over fifty years the name Webb has been synonymous with the best in dry goods and clothing for the entire family. Son Dave Battle Webb is now the active head of the business and receives the

Chemists Develop New Type Grain Insecticide

BALTIMORE (AP)—An insecticide which its makers say is the first to protect grain from insects and yet be harmless to man has been developed here. U. S. Industrial Chemicals, Inc., which has been developing the insecticide for four years said wheat farmers are now losing up to 45 cents a bushel on their crops because of insect damage.

The new development is intended to prevent insects from invading stored grain. It's not recommended for treatment of grain already heavily infested. The company said the insecticide is not dangerous to humans or animals even when used in quantities far exceeding those recommended. The treated grain can be used for flour and cereal or fed directly to livestock without

help of other members of the Webb family who are interested in the business.

special processing. The product is a combination of a new chemical, piperonyl butoxide, and pyrethrins. The insecticide is mixed with pulverized wheat or talcum powder to make it cling to the grain.

Lionesses Honored
Morehead City Lions honored their ladies with a picnic Thursday night on Money Island beach. A fried chicken supper was served to the 80 guests. Fred Lewis was in charge.

CHEVROLET TRUCKS deliver more horsepower at the clutch*

PLUS-Chevrolet Advance-Design Truck Features!

TWO GREAT VALVE-IN-HEAD ENGINES • NEW POWER-JET CARBURETOR • DIAPHRAGM SPRING CLUTCH • SYNCHRO-MESH TRANSMISSIONS • HYPOID REAR AXLES • DOUBLE-ARTICULATED BRAKES • WIDE-BASE WHEELS • ADVANCE-DESIGN STYLING • BALL-TYPE STEERING • UNIT-DESIGN BODIES

Net horsepower . . . the power you use, the power delivered at the clutch . . . is the true measuring stick of a truck's ability to haul payloads. And for net horsepower, Chevrolet heavy-duty trucks with Loadmaster engine have no equal among the five most popular standard equipped makes in their weight class—13,000 to 16,000 lbs. G.V.W. Chevrolet heavy-duty trucks lead them all! Compare the facts! Check the serial plates of all other popular makes for proof. And remember—it's the power at the clutch that counts! Come in and let us tell you the full story of Chevrolet's truck leadership.

First in demand First in value First in sales

*Proved by certified ratings on engines used as standard equipment in conventional models of the five most popular makes.
