Democrats are Losing Ground!

Returns thus far in THE NEW6-TIMES poll on presidential candi-dates indicate that Carteret county could easily go Republican in a presidential election!

Almost without exception per sons answering the poll believe the Truman administration is corrupt. One citizen termed it "woefully in-efficient" while others said that even though they are Democrats they would vote for a Republican presidential candidate.

This is another indication that Americans will take just so much They're fed up with political hi-jinks, with the little fellows foot-ing the bills and the big guys thumbing their noses at Washing

Votes for the Republicans are almost evenly divided among Stassen, Taft, and Eisenhower.

On the Democratic side of the fence, Kefauver has the edge over Tuman among those who say they are Democrats and who will vote the Democratic ticket come next November.

The results thus far are surprising, but no accurate prediction can be made until more of the forms accompanying this article are filled in, clipped out, and returned to THE NEWS-TIMES office.

Everyone may have fine inten tions of doing just that, BUT DO IT NOW. If you wait till you finish reading the paper, you'll forget it. How other people are thinking will vitally effect you and the type of administration you will live under for the next four years.

Unless you know how the home folks think — which can be found out through this poll — it will be impossible to decide how much you have to take the stump for your candidate!
