You can swing it if you try

HAVE you, by any chance, been casting eyes at a Buick, and promising yourself that someday you will take the Big Step and have one all your own?

Let us whisper something to you. The "big step" isn't big at all.

We know that's true, because such a high percentage of present Buick owners traded in a car tagged as belonging in "the low-priced field."

So why not set your sights on this star performer?

Why not enjoy big-car comfort — big-car power — big-car prestige for your money?

There's one of these lively lovelies waiting for you to come in and try it.

Get the feel of its mighty Fireball 8 Engine, that's a gas-saving high-compression valve-in-head. You could pay \$300 to \$400 more for a car that doesn't match its horsepower.

Get the feel of Dynaflo Drive*, that lets you ride relaxed — feeds a silken flow of power — and at the same time cuts down on upkeep costs, by protecting the engine, the rear end, and even the tires, from driving strains.

Get the feel of a ride that cost a million dollars and more for controls of end-sway and side-roll and vertical "throw" — for X-bracing the frame and V-bracing the torque-tube keel — for a total of 15 ride-engineering features.

One thing you'll know for sure when you've tried it. This car wasn't "built to a price." It's a Buick through and through.

But the fact remains that — when you check the price of a Buick SPECIAL against the price tags on so-called "low-priced cars" — you'll find out you can swing it if you really want to.

And brother, will that make your family happy!
