26. Make supplies
27. Wander
28. Unclose
29. Indigo plant
30. Medical fluids
31. Card with three spots
32. Adversative voice

Plants Change Air to Wood

Ottawa (AP)—The National Research Council says plant life is miles ahead of man when it comes to manufacturing processes. Two of the council's scientists found that plants can change air into wood in less than 10 seconds. In this period carbon dioxide becomes solid cellulose, the material which forms the framework or skeleton of most plants.

Dr. Paul M. Laughton and Dr. D. C. Mortimer, of the plant physiology section of NRC, exposed sugar beet leaves to small amounts of carbon dioxide under a bright light.

The carbon dioxide was first made radioactive so it could be identified when it got inside the plant. The leaves were allowed to absorb the gas for varying periods and then were killed in boiling water.

Radioactive cellulose was found in the leaves even though they had absorbed the gas for only 10 seconds.

"This cellulose must have been made from the radioactive gas," the council said. "It follows that the plant can make these extremely complex changes, from air to wood, in less than 10 seconds."

Russell's Creek Club Adopts 'Help a Neighbor' Project

At the February meeting of Russell's Creek Home Demonstration Club, the members decided on a club project for 1954. Their project is "Help a Neighbor." Club members will be available to help any person who has sickness or is otherwise in need in the Russell's Creek community.

Russell's Creek has been very active for the past two years in club project work. In 1952 they land-scaped the Russell's Creek Free Will Baptist Church in their community, and in 1953 they landscaped the Oak Grove Christian Church, another church in their community.

As a club, they have also contributed baskets of food and other things to the sick and needy near them.

Besides the usual club program this club is rendering a wonderful program of community service.

Average Service Man Is A Good Air Traveler

Roanoke, Va. (AP)—The "small time" operation who tries to act big time is the biggest headache in air travel, says Miss Shirley McManus, of Washington, an American Airlines stewardess.

She describes a "small time" operator as a person who has traveled little and tries to make everyone think he is a globetrotter. Annoying habits are snapping fingers at stewardesses and addressing them as "Dearie."

Easiest air traveler to please? Average service man. Business men who travel regularly are an easy second.

English countrymen formerly believed that stone axes chipped by primitive men and found on their farms fell there in the form of thunderbolts.

News from NEWPORT

Feb. 11—Mr. and Mrs. C. W. Gill of Raleigh spent the weekend with her parents, Mr. and Mrs. I. N. Howard.

Mr. Parker Herrington returned to Rocky Mount Friday after spending several days here with relatives.

Mrs. Nelson Brown was the guest of Mrs. Jennings Teal of Tarboro over the weekend.

Mrs. Edgar Hibbs, Mrs. Louis Hibbs and Mrs. Parker Guthrie were business visitors in Goldsboro Wednesday.

Miss Peggy Bell of ECC, Greenville, visited her parents, Mr. and Mrs. Stancil Bell, over the weekend.

Mrs. T. R. Garner attended a district meeting of home economics teachers at Washington Saturday.

Mr. and Mrs. Raymond Heath and daughter, Emily, spent Sunday with his parents, Mr. and Mrs. Walter Heath.

Mr. Leon Mann went to Raleigh Saturday to attend a postmasters' meeting. He spent the night with his brother and his wife, Mr. and Mrs. M. G. Mann and returned home Sunday.

Mrs. Parker Herrington and R. D. Garner went to Durham Saturday to visit Mr. Garner's father,
