Hotbed Can be Built To Fit into Window

Hotbed for basement window well. Cross sections show how it fits window. (Masonite Design)

Some flowers that bloom in the spring call for a winter workout on the part of the home handyman—such as building a hotbed for starting seedlings.

A basement window facing south provides a fine location for such a miniature conservatory. The hotbed is designed to fit right into the window and to be nailed to the window frame. The basement window is kept open to provide warmth for the seedlings, while a new window is placed outside of the areaway at an angle to capture the sun's rays.

An inexpensive thermometer, fastened inside of this hotbed, will indicate any need of ventilation.

It's easy to frame this hotbed to the dimensions of your basement window by using 2 by 4s and 2 by 2s supporting a "skin" of tempered hardboard 3/16ths inch thick. To form a seat for the hinged slanting window, 1 by 1s are nailed around the frame. Hardboard wings and top are built to fit into the window opening to seal off cold drafts from the sides.

Outside of the window well, the hardboard sides and front are carried down and embedded in the soil to a depth of at least 1 1/2 inches to form a seal around the structure.

After priming, the outside of this hotbed can be painted to match the trim of your house.

When properly used, this contrivance can give you vigorous plants long before seeds begin to sprout out of doors.

Jury Can't Tell Cow Difference—Frees Farmer

Chatham, Va., (AP)—A farmer was accused of taking a neighbor's cow. He explained that he had found his missing cow—or the animal he thought was his—in their neighbor's pasture. He asked the jury to step out on the courthouse square and examine the two cows.

The jurors couldn't tell one from the other. The farmer was acquitted. He and his neighbor took their cows home—or so they believe.

THIS IS THE MAN WITH A PLAN For the Working Man

In case of disability it pays for itself and pays you a monthly income up to \$350.00.

It pays the face amount for natural death. It pays double the face amount for accidental death.

In case you live and keep good health, it automatically becomes a retirement plan.

Lizard Fossils Tell Age Story

Los Angeles (AP)—Fossils of lizards and frogs tell more of pre-ice age climate than the bones of mastodons and sabre tooth tigers, says a zoologist. Large animals could easily walk away from an advancing glacier, but it might take a lifetime for a small lizard to crawl out of a large valley, Bayard Brattstrom, zoologist at the University of California at Los Angeles, reasoned. Thus bones of small animals unable to get away tell more about the climate of a particular area than those of more mobile beasts.

Studying small fossils from the La Brea tar pits, the zoologist determined that 50,000 years ago the Lost Angeles basin was a grassy woodland covered with large oak and walnut trees, with probably less rain than it has now. Ponds and streams existed, however, since bones of turtles, frogs and toads were found in the tar.

Fossil lizards and snakes in Nevada caves indicate the Las Vegas area 10,000 years ago was a desert, but not as dry as now. Brattstrom said one million years ago Florida had a subtropical climate—reptiles and amphibians found there survived the inundating ice in more northern areas.

Fickle Elements Delay Airline Stop Ceremonies

Butler, Pa. (AP)—The fickle elements played a dirty trick on operators of the Allegheny Airlines. Some 20 officials of Butler and officers of the airlines attended a breakfast at the Butler-Graham Airport here and then lined up to watch the airline make its first scheduled stop at the airport. The ceiling closed in and the plane was unable to land.

Make Do

Empty paint cans under the feet of a ladder will spread weight to keep the ends from sinking into soft earth. The American Home magazine says the cans act like snowshoes and cut the danger of ladder shifting while you're on it.

Court Confirms New York Church's Title to Land

New York (AP)—It may now be said that Trinity Church, which has occupied a site in lower Manhattan's financial district for about 300 years, has a right to be there.

A legal suit, brought on behalf of Dorothy McClatchie and claiming ownership of the property through a 1642 grant to her ancestors, was recently thrown out of court—partly because of "the passage of time."

North Carolina Participates In National Courtesy Crusade

"Failure to share the road with others is a dangerous threat to safety on our streets and highways," Major C. A. Speed, director of the Motor Vehicles Department's Highway Safety Division said today. The application of common sense courtesy on the part of drivers would do a lot to reduce accidents, he pointed out.

Speed chose these words to stress the importance of highway courtesy which the Motor Vehicles Department and cooperating local agencies are emphasizing in March.

"Many traffic accidents occur when drivers are straddling the center line of the road, or when they neglect to yield right of way to pedestrians or other drivers at intersections," Speed declared.

It is just common sense too, and courtesy, for drivers to dim their lights when they approach or follow other cars at night, he said.

"And it is common sense, and courtesy, to drive at a safe speed for road, traffic and weather conditions," Speed explained, "because an unsafe speed endangers the lives of pedestrians and other motorists. If you lose control of your car those innocent, as well as yourself, may suffer from your haste."

With the proper attitude of sharing the road with others, these dis-

courteous, unsafe practices would disappear, according to Speed. Referring to last year's fatal motor vehicle accidents, Speed said they indicated that the following list of courteous acts must be considered basic to safe driving:

1. Share the road by driving in the proper lane.
2. Allow ample clearance when passing.
3. Yield the right of way to other drivers . . . to pedestrians.
4. Give proper signals for stops

5. Dim headlights when meeting or following vehicles.
6. Respect traffic laws, signs, signals and road markings.
7. Adjust driving to road, traffic and weather conditions.

"All these points are summed up in the slogan being publicized in this nationwide program," Speed said.

He urged everyone to remember and act on the slogan, "Make Courtesy Your Code of the Road."
