Normal Spine Health Necessity

By DR. R. O. BARNUM, Morehead City, N. C.

Perhaps you find it difficult to understand why Chiropractors confine their work to the spine, when remote parts of the body are diseased. But you find nothing strange about pushing a button on the wall to light a globe suspended from the ceiling. The procedure is practically the same. Connection is made between the sources of energy, the brain or dynamo and the body or electric globe. It makes no difference whether it be heart, stomach, kidneys, or some other organ. Normal function of all organs, muscles and tissues of the body depend upon supply of the vital nerve energy conveyed to them over the nervous system from the brain which generates this energy. Nerves emit from between vertebrae, so when falls, jars, or strains misplace a vertebrae, pressure on nerves is produced which interferes with normal function, creating disease.

Adjusting misplaced vertebrae is like pushing the button to produce light: its restored flow of vital energy and health is the natural result.

To you it may seem miraculous that we can adjust vertebrae and relieve high blood pressure, constipation, sinus, stomach or kidney trouble, and in fact, most of the ills to which humanity is subjected.

Instead of treating effects, the Chiropractor seeks the cause responsible for effects, known as disease, and by proper adjustments eliminate the cause.

Health is your natural heritage. Guard it by keeping your spine in normal condition.

Doctor Reports On Accidents In Small Boats

Small boat accidents take about 1,200 lives each year, more than most communicable diseases, a physician reported in the current Today's Health magazine, published by the American Medical Association.

However, with few other sports can accidents so surely and completely be avoided by simple precautions, Dr. Carl J. Potthoff of Washington, D. C., said.

At this season parents should encourage children to take skills and safety courses offered free by the Red Cross, he said. Most boat accidents result from reckless behavior, ignoring storm threats, overloading leaky boats, and using defective motors.

About 90 per cent of accident victims are men or boys, and the "supposedly careful" 25 to 44 year old group accounts for as many deaths as the 15 to 24 group.

Dr. Potthoff urged using only boats that will float if capsized, taking life preservers, and not trying to swim ashore if there is any other means of rescue or any floating object to hold on to.

THIS IS THE MAN WITH A PLAN For the Working Man

In case of disability it pays for itself and pays you a monthly income up to \$350.00.

It pays the face amount for natural death. It pays double the face amount for accidental death.

In case you live and keep good health, it automatically becomes a retirement plan.
