#### Stomach Weakness

By DR. R. O. BARNUM, Morehead City, N. C.

Disease of the stomach are divided into many classes and called various names but back of all there is a cause that is common to all, nerve weakness. We have seen many types of stomach weaknesses and have never found one without some interference to the nerves leading to the stomach.

Nerve interference lowers the vitality to any organ. Hundreds of people are enjoying stomach health today because of the removal of nerve interference, after other methods have failed.

When we realize that severing the nerves leading to the stomach would cause the stomach to be paralyzed then it is easy to understand that any interference to the nerves would cause weakness in proportion to the interference. For this reason stomach weakness should be benefited by Chiropractic.

The responsibility of the Chiropractor to the public health is to prevent, correct or control those conditions of the spine which, by interfering with normal nerve function, causes disease.

(One of a series of articles published to explain and illustrate the practice of Chiropractic).
