Mr. and Mrs. Jack Neal spent Saturday in Raleigh with Mr. and Mrs. Tom Hood of Fayetteville and

### Margaret Bryant Married To Allan Howard Garner

Mrs. Margaret B. Rosa announces the marriage of her daughter, Margaret Elizabeth Bryant, to Mr. Allan Howard Garner, son of Mr. Randolph Kelly and the late Mr. Fernie Thomas Garner of Newport, on Wednesday, Sept. 8, at 8 o'clock in the evening.

Mr. L. W. Hassell, justice of the peace, performed the ceremony in his home, in the presence of immediate members of the family.

The bride wore an ice blue suit with matching accessories and a corsage of white roses.

Mrs. Steve Zueha of Beaufort, cousin of the bride, was matron of honor and Thomas Lee Garner of Newport acted as best man for his brother.

Present at the ceremony were Mrs. Kelly, mother of the bridegroom; Mrs. Rosa, mother of the bride; Danny Rosa, brother of the bride; Mrs. Mary Davis, aunt of the bride; Mrs. Zueha, Mr. Thomas Lee Garner, Mrs. L. W. Hassell, and Mr. G. E. Rumer of Cherry Point.

Following the wedding ceremony, Mrs. Rosa entertained at a reception at her home at 1504 Ann St., to honor the bridal couple.

The bride is a graduate of Beaufort High School and is now secretary to Gene Smith, Beaufort attorney.

The bridegroom is a graduate of Newport High School and is now employed at the A&P in Havelock. They will make their home on Lennoxville Road.

Mr. Hassell said the marriage was the first he has performed in his capacity as justice of the peace.

### Mr. M. A. Hill Returns From Summer Naval Tour

Mr. M. A. Hill, professor of mathematics at the University of North Carolina, and son of Mrs. Sarah Hill of Beaufort, returned to his home in Chapel Hill last week from a cruise on the battleship Wisconsin. The Wisconsin is the flagship of a fleet on which cadets from Annapolis and university and college ROTC's were taken for two months' training. Mr. Hill was one of several guests of the Navy.

The fleet sailed from Norfolk July 12, crossed the Atlantic, was at Glasgow, Scotland, for three days and then went through the Irish Sea to Brest, France.

The fleet recrossed the Atlantic to Guantanamo Bay, Cuba, where Mr. Hill boarded a plane to return home.

attended the game between the Green Bay Packers and the Washington Redskins.

Mrs. Emma Mumford was taken to Duke Hospital Thursday and underwent an operation there yesterday.

Herbert Prytherch Jr. left last week for Boone to enter the freshman class at Appalachian College.

Mr. and Mrs. Paul Towson and three daughters of Braddock Heights, Va., spent the weekend here.

Gordon Davis and Wallace Conner left yesterday for Wake Forest to enter the sophomore class.

Mr. and Mrs. W. E. Adair returned home Friday from Williston where they had been spending the summer.

Dr. Phillip Mason of Richmond, Va., spent the weekend with Miss Bertha Fulford and her parents, Mr. and Mrs. Vance Fulford.

Billy Downum Jr., arrived home Saturday, from Fort Jackson, S. C., after completing his basic training.

### THIS IS THE MAN WITH A PLAN For the Working Man

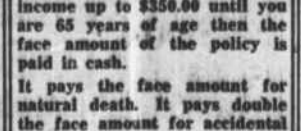

In case of disability it pays for itself and pays you a monthly income up to \$350.00 until you are 65 years of age then the face amount of the policy is paid in cash.

It pays the face amount for natural death. It pays double the face amount for accidental death.

In case you live and keep good health, it automatically becomes a retirement plan.

## Oysters

(Continued from Page 1)

North Carolina oysters are, thanks to legislation enacted by the 1947 General Assembly at the request of the Department of Conservation and Development, getting better opportunities to grow.

This legislation is known as the Oyster Rehabilitation Act. This legislation has enabled Director Ben E. Douglas of the Department of Conservation and Development and Assistant Commissioner Holland to carry on and broaden opportunities for the state's oyster industry.

### Better Protected

The 1947 act not only provided for greater protection of North Carolina oysters but it also required the C&D Department to exercise closer supervision over oysters in their marketing stages.

The C&D Department has received excellent cooperation from the Institute of Fisheries Research, an agency of the University of North Carolina. The institute, which is under the direction of William A. Ellison Jr., is carrying on constant studies of finfish and shellfish found and caught in state waters.

Dr. A. F. Chestnut, assistant to Mr. Ellison and chief of the mollusk investigations for the Institute of Research, says the oyster rehabilitation program has resulted in the improvement of the sanitary rating of the Tar Heel bivalves to such extent that they now rank with the best in the nation from a health standpoint.

The high sanitary rating given North Carolina oysters when they are taken to market has been brought about by close cooperation by the Department of Conservation and Development with the shellfish sanitation office of the State Board of Health and with agencies of the federal government.

### Good Sanitary Rating

McKeithan Caldwell, who maintains an office here in the headquarters of the C&D Department's commercial fisheries division, and his assistants carry on constant investigations of shellfish taken from state waters and plants of those who offer shellfish for sale at retail and wholesale.

Strict enforcement of the cull law written into the 1947 oyster rehabilitation statute is also helping improve the quality of Tar Heel oysters. Under this law oysters taken from publicly owned bottoms must be culled where caught and if they are less than two and one-half inches at their longest diameter they must be returned to waters from which they are taken.

Dredgers as well as dealers generally admit the cull law is one that is beneficial to the oyster industry.

### 1947 Act Pays Off

Still another section of the 1947 law is also paying off as the C&D Department strives to build up the state's oyster industry.

This is the law imposing a state tax of 50 cents a bushel on all oysters shipped in the shell outside the state. The result is that more North Carolina oysters are now being marketed as North Carolina oysters and not given labels as having been grown in some other State.

Thanks also to the 1947 act, Holland and his aides now have more oyster shells to plant in bottoms from which they have been taken and in areas where shells are needed by young oysters which must have something to which to attach themselves if they are to grow to anything like maturity.

Each oyster dealer is required by

## Women 'Do It Themselves'

The do-it-yourself craze has gone to most women's heads. A survey of more than 1,500 women concludes that 96 per cent of them regularly do their own hair grooming.

Hair care includes shampooing, conditioning, setting, massaging and use of tonics and home permanents. According to the survey, prepared by a beauty institute, many women feel personal hair conditioning is practical.

Sixty per cent of the women questioned live in urban areas, 40 per cent in rural sections. Income seemed to have little influence on the frequency of home care: 32 per cent of the women were over the \$5,000 bracket, 31 per cent from \$3,000 to \$5,000, 37 per cent under \$3,000.

Wide differences are shown in methods of using hair preparations successfully. Some women use them before or after shampooings, and some between washings.

Recommended by the institute is a pre-shampoo treatment with a pure petrolatum hair tonic and a hot oil method which calls for

law to give the state one-half of his oyster shells for replanting purposes.

Knowing that storms and other factors had caused extensive damage to oysters last season, Director Douglas, directed Commissioner Holland earlier this year to increase the planting of seed oysters as well as the planting of more shells in publicly owned oyster bottoms.

As a result of these increased efforts, more than 34,000 tubs of seed oysters were planted this season in the waters of Carteret, Pamlico, Hyde, Onslow, Pender, New Hanover and Brunswick Counties. These oysters will not reach full maturity for three years and in the meantime they will be protected as they grow.

In addition to the record planting of seed oysters, the C&D Department put out some 54,000 bushels of shells in bottoms known for their productivity of oysters in the past. These shells were planted largely in waters of Pamlico, Hyde and Carteret Counties.

steaming the head with hot, wrung-out towels.

The national survey, which took six months to complete, reports many women make the mistake of dousing the head with oil. Tonics should be used sparingly, just enough to lubricate the dry ends and give the hair a gloss.

Customs in hair care vary with age, dwelling and geography, the survey shows. Home grooming is more popular with Westerners, Southerners, farm women and women over 30 years old.

City-dwellers, young women and Easterners tend more toward professional hair care.

### City Attaches Fine Box To Parking Meter Posts

Waukon, Iowa (AP) — If you get a parking ticket in Waukon, don't rush to the police station to pay the fine. Patronize one of the city's "courtesy boxes."

The boxes, painted yellow, are attached to the parking meter post. Parking tickets are placed in envelopes before they are stuck under the windshield wiper. The motorist places a dime in the envelope with the ticket and drops it into the box.

Mrs. Jarvis A. Scott has moved back from Brooklyn, N. Y., and has taken her mother, Mrs. Herbert Parkin, who was staying at the Bogue Sound Rest Home, to her home at 210 Broad St., to live with her.
