Railroads, Postoffices Suggest Mailing Early

The railroads of America and the United States Postoffice Department are again this Christmas season cooperating in a joint effort to speed the delivery of what is anticipated to be the largest Christmas mail load in the history of the department. Postmaster General Arthur E. Summerfield announced today.

passing through these stations of the advantages and need for early Christmas mailings. In addition, the association has suggested that the "Mail Early" theme be included on advertising matter, such as posters placed in cars, special dining car menus and, if possible, in connection with any advertising that might be done by any individual railroad.

Navy Experiments With Speedy Hydrofoil Craft

Norfolk, Va. (AP)—The Navy is experimenting with some fast-flying hydrofoil craft which look like small planes which never take off. The Navy isn't convinced that there is a mission for them—they make 75 miles per hour on (or over) water. They are powered by two aircraft engines. They ride on three foil-equipped struts, one under each wing and the tail.

WITH THE 4-H'ERS By FLOY G. GARNER Home Agent By ALVIN C. NEWSOME Assistant County Agent

During this week, all of the 4-H Clubs in Carteret County have met, with the exception of Beaufort. The meetings have been good. When you sew, it is necessary to use proper tools for best results! That was the keynote of the Junior 4-H Club meetings.

They saw a suggested sewing box with the proper sewing tools arranged in it. They had discussed with them the difference in tools classified as gadgets or gimmicks and those that are considered necessities. The necessary tools demonstrated to those 5th and 6th grade girls included scissors and shears. We learned that scissors are shorter and have a ring handle both the same size with blades less than 6 inches in length, whereas the shears blades are from 5 to 15 inches long and the handles are bent.

An emery bag is almost a must in our climate. The purpose of this bag is to sharpen and remove rust and tarnish from pins and needles. The thimble should be used with the first stitches. It not only protects your finger but helps you do a better job. Be sure it fits and is not too heavy, and wear it on the middle finger of the right hand (or left, if you are left-handed).

The tape-line is another beginner's tool that helps even the first sewing have that professional look. The tape measure assures accuracy—the eye sometimes deceives us. When sewing, we find we use contrasting thread for basting and matching thread for stitching. We also learned that not all thread is made of cotton—so when we use the term "cotton" meaning thread, we are not always right.

The Intermediate 4-H Clubs saw sample sweater collars they can make and a short demonstration on choosing correct styles for different type people. They also saw the fitted sewing box, plus added equipment for their experience.

In the Senior 4-H Club groups, the discussion and demonstration was centered on "Q's to U for Correct Dress." Artist sketches were used to show that a closet full of clothes is not the determining factor in a girl's good looks.

Neither is the amount of money she spends on clothes. It's how good she is in selecting things which go together and look good that counts. Regardless of cost and amount of clothes on hand, the best wardrobes are those built around a definite plan.

We saw right before our eyes one basic dark dress changed into eight different outfits. Knowing what to wear, how to acquire it at a minimum cost, and when to wear it correctly, is an accomplishment these 4-H'ers are making great strides in.

The Senior 4-H Club girls will probably be seen wearing many and varied types of sweater collars made from the patterns they are getting at club meetings. These might also be included on your gift list for Christmas. They can be made from the scrap bag in many cases and will therefore keep you in better financial stand.

School Children Prove They Can Save Money

Fall River, Mass. (AP)—Greater Fall River school children are discounting the belief that you can't save any money these days. They have \$728,477.78 on deposit under the School Saving plan inaugurated eight years ago. Average savings per student is \$48.95. Most deposits have been in nickles and dimes.

Contagious Litter Richmond, Va. (AP)—Highway Department experts say litterbugging begets litterbugging. Most people hesitate to throw trash on the clean shoulders of a highway. But when once somebody starts tossing out paper and empty beer cans others follow suit.

News from HARLOWE Nov. 7 — Mrs. Emma Davis visited Mrs. Mary Arrington at Beaufort last Thursday. Mr. and Mrs. George Ball and Mrs. Lionel Conner attended the Ice Capades at Raleigh Monday. Mr. Wallace Conner, Wake Forest, spent the weekend with his parents, Mr. and Mrs. L. N. Conner. Mrs. Kuch Williams and daughter, Mrs. Luke Turner and son, Mrs. Gordon Becton and Mrs. E. R. There are 20 types of poisonous snakes in the United States, divided into four kinds: coral snakes, copperheads, water moccasins and rattlesnakes.

Dear Friends Denver (AP)—Alfred L. Dumont, who retired after 31 years with the Game and Fish Department in game-rich Colorado never has killed a deer and doesn't intend to kill any. He says the animals got to be friends during the early years of his service with the department when he took long lonely trips into the mountains as part of his duties.
