

Newport FFA Plans Outing

Members of the Newport FFA Chapter are attending the White Lake FFA camp this week. C. S. Long, vocational agriculture teacher at the school, accompanied the boys to camp.

Those boys who went are Jimmy Mann, Eric Gray, Johnny Skinner, Leslie Riggs, Harold Pollock, Frank Mills, Dicky Garner, Ganes Chapman, Terry Garner, Mitchell Adams, Jimmy Skinner, Tommy Howard, Curtis Jones, Allen Gray, Jerry Brown, David Durham, Louis Kelly, Lewis Forrest and Carol Mills.

The boys left Newport early yesterday morning and will return about noon Saturday.

Night programs at the camp include vespers, business, conservation, safety, music, group games, novelty relay races, square dancing, and special entertainment by individuals and groups and quiz programs.

How to Make Best Use of Study Plan

Taking the HW-58 study plan to your contractor will enable you to get estimates on the basic plan and the two alternate plans of the vacation house.

These estimates will help you determine which of the plans you want to follow—presupposing that present family needs permit you to make a choice. With children, you would, of course, select one of the alternate plans.

Moisture-Proofing Important Factor

Design HW-58 can be built on a concrete slab or over a crawl space. In either case, the home owner should see to it that adequate moisture-proofing procedures are followed.

Important at all times, this is especially so when a house is located near a body of water.

In addition, any house built over a crawl space should have plenty of ventilation between the ground and the first floor.

On June 22, 1921, the Wright Aeronautical Corp. was the first aviation company to have its stock traded on the New York Stock Exchange.

"Pyrofax" gas is clean — makes housekeeping so much easier. Helps you save steps, save time. And, it's completely dependable for cooking, water heating, clothes drying, and room heating.

Vacation House Can Grow

Here is final version of expandable cottage. Exterior is vertical redwood siding.

plans is used, the storage area becomes a private hall for access to the lavatory and shower room from the bedroom addition.

With alternate plan Number One, a single bedroom is added to the left rear of the house directly behind the shower room. It has cross ventilation and a large closet.

With alternate plan Number Two, a second bedroom is added between the first one and the terrace. It, too, has cross ventilation and a large closet. A door from this bedroom leads to the leisure room.

The basic design features an indoor motif, with an outdoor terrace literally "growing" off a huge indoor leisure room. Only sliding glass doors separate the two.

A fireplace in the leisure room and a grille on the terrace share the same chimney. A wood fence on two sides of the terrace can provide outdoor privacy if necessary.

A folding partition between the leisure room and the kitchen can be used to combine or separate these indoor areas, as desired.

The side door provides a convenient entrance for returning swimmers and other sportsmen, since it leads almost directly to the shower room. This in turn is accessible to a lavatory. Both rooms can be used privately.

Architect York has provided a spacious storage area, not only for luggage, but for sleeping when the basic plan is used without one or both of the extra bedrooms. This storage-sleeping section has a large closet, an entrance to the lavatory and another to the leisure room.

A whole family, of course, can use the leisure room as a sleeping area with the use of convertible furniture.

When either of the alternate plans is used, the storage area becomes a private hall for access to the lavatory and shower room from the bedroom addition.

With alternate plan Number One, a single bedroom is added to the left rear of the house directly behind the shower room. It has cross ventilation and a large closet.

With alternate plan Number Two, a second bedroom is added between the first one and the terrace. It, too, has cross ventilation and a large closet. A door from this bedroom leads to the leisure room.

The basic plan has a frontage of 42 feet and is 18 feet from front to rear for a total of 738 square feet. On a narrow lot, it can be turned so that the present side door will serve as the front door. The plans show an alternate front elevation.

Alternate plan Number One totals 936 square feet... alternate plan Number Two 1,057 square feet. A carport or garage at the left side of the house is optional with any of the three plans.

Also optional, and shown in the plans, is a centrally-located floor furnace so that the house can be used in the winter as well as the summer in certain sections of the country.

Architect York recommends vertical redwood siding on the exterior, with a white asphalt shingle roof. The redwood is exceptionally durable near lakes and beaches and wherever there are periods of high humidity. Natural-finished wood panelling is suggested for the interior.

Wouldn't the possibilities of this modern, economical vacation home fit that favorite retreat you've always wanted to build to escape the summer heat?

THE NEWS-TIMES
Enclosed is 35 cents. Please send me a copy of the study plan for The House of the Week, Design HW-58

NAME _____ (Please Print)

STREET _____

CITY _____ STATE _____

You can take this study plan to your bank or other mortgage lender and to your builder and get rough estimates on the cost of construction in this area, as well as an idea of the relation of the cost to your budget.

With this information you will know whether you will want to proceed with construction by ordering working blueprints direct from the architect and asking for bids for the work.

You can get a study plan for The House of the Week by filling in your name and address on the coupon on this page and sending it with 35 cents to this newspaper.

This study plan shows each floor of the house together with each of the four elevations, front, rear and sides of the house. It is scaled at 1/4-inch per foot. It includes a guide on "How to Get Your House Built."

Newport Rotarians Star in Own Movie In One-Night Stand

Newport Rotarians starred in their own movie last Monday night. They saw movies taken at the dress rehearsal of their womanless wedding. Monroe Garner, guest of program chairman Moses Howard, showed the films. The Rotarians met at the educational building of the St. James Methodist Church.

Mr. Garner showed the movies as they were taken the first time and then ran them backwards.

Visiting Rotarians and guests who enjoyed the program were the Rev. Guthrie Brown, J. David Murray and W. C. Carlton, Morehead City, Harvey Garner and Jimmy Kelly of Newport and R. L. Pruitt, former principal of the Newport School.

Snack bar separates kitchen and leisure room. Folding partitions combine or separate these areas.

Practical Jokers Play Games on Chest X-Ray

Los Angeles (AP)—Before having a Health Department chest X-ray, a local wag tucked inside his shirt a profile of a girl's head cut from tinfoil, which is impervious to the penetrating rays.

Then he signed his brother's name to the identification card.

When the brother recovered from the shock, this was his revenge: He cut two letters from a sheet of tinfoil, slipped them under his shirt before being X-rayed, and gave the Health Department the first brother's name. The letters which showed up on the film were "T.B."
