California Senator Lauds American Film Industry

Thomas H. Kuchel of California the past year. Foreign pictures, an address to the Senate on foreign actors and actresses, for in an address to the Senate on Thursday, Feb. 26, paid tribute to the motion picture industry as a significant "international messenger" that produces a "vastly admired commodity all over the world."

"And these nominations are important news, all over the world."

Today, in Rome and Paris and Bombay and New Delhi and Tokyo and hundreds of other cities and burdends of other cities.

Senator Kuchel's remarks, after the Academy Awards nominations,

"As many of my colleagues who have traveled widely know to most people abroad the word California frequently means Hollywood and the movies.

'So pervasive and widespread is this great American medium that names of many American movie stars and of many American films are almost as well known as that of the Great American president whose birth the Nation served Sunday.

"In carrying out another annual custom of wide significance, the American motion picture industry has just paid deserved compli-ments to some of its personnel who typify the reason American movies are a potent force for better un-derstanding of our way of life

tion Picture Arts and Sciences has tions for its widely known and coveted Oscar awards. Presentation to the final winners will be made next month over a nation-wide network expected to bring the ceremony to an audience of 90 million people. "Hollywood, of course, is more

than a place of glamor and excite-ment. Hollywood is big business by any standards. It is the base for one of California's leading industries; it affords employment to many thousands of persons in my state directly, and to scores of more thousands—all over the Nation and around the globe—indirectly. Its impact economically

and culturally is world wide.
"Today, more than ever, this universal character of the motion picture is typified in the nominations made for the awards for per-

The American motion picture has become an international messenger. It has brought America to the doorstep of the most remote villager in all the far-flung places of the world. American motion pictures are a vastly admired commodity all over the world, alike in countries which have no picture production of their own, and in countries which are major producers.

"Thus, in India and Japan, which numerically produce far more pic-tures than the United States, our technique, our artistic talent, our writers, and our actors and ac-tresses are regarded as the acme

of the profession.
"We are pleased that in all counamong peoples of varied races and cultures.
