## **Limits Defined On Fishing Around Piers**

### Fisheries Committee **Meets, Winston-Salem**

### Fisheries Regulations **Codified**, Approved

A new regulation adopted by the commercial fisheries committee at its recent meeting, states that no one, except fishermen on the piers, may fish within 500 feet of the end of the pier or within 300 feet on either side.

Fishermen in boats interfering with anglers on piers have been a source of contention along the North Carolina coast.

The attorney general informed the fisheries committee, in session last week at Winston-Salem, that the commercial fisheries division has no authority to supervise sports fishing piers, but it does have jurisdiction over waters surrounding the piers.

The regulation will be advertised 30 days before it becomes effec-

The committee decided that July 1962 would be the earliest a hearing on issuance of private oyster leases in the South River area could be held. The hearing, when the date is set, will be at Morehead City.

The fisheries committee has requested Hargrove Bowles Jr., director of the Department of Conservation and Development, to ask the governor for \$2,500 to \$3,000.

The funds would finance a survey in lower Albemarle sound to determine the advisability of dredging oyster shells there for road materials and poultry feed.

The survey would also report on the effect of such dredging on fish and wildlife and would be made under the supervision of Dr. A. F. Chestnut, director of the Institute of Fisheries Research, Morehead

City. The committee urged that the The committee urged that the survey be made as soon as possible order to clear the way into the strate and an as a soon as possible dviation Fuel Terminals dock. after funds are provided and says Aviation Fuel Terminals dock. results of the survey will be the There is a possibility that the dredging.

# **30 Attend Good** Egg Breakfast **Friday Morning**

Thirty people, representing poultry producers, county agents and and county officials from Beaufort and Morehead City, attended a Good Egg breakfast Friday morning at the REA building, Morehead City.

Mrs. Frances Lamm, egg consultant with the North Carolina market association, delivered the main talk. She spoke on the nutritional value of eggs and discussed the growth of the egg industry in North Carolina.

Guests at the breakfast included mayors George Dill and -William H. Potter of Morehead City and Beaufort: county commissioner Gaston Smith; county agriculture agent R. M. Williams; home economics agent Floy Garner and W. C. Carlton, manager, Carteret-Craven Electric Membership Corp. burning of the tanker Potomac in

## Waterfront Brings Thrill

# Photos by Reginald Lewis This is the "thing" that got away just as it was gaffed at the bow of the trawler, Little Sister.

#### By ELLEN MASON

A big one got away Tuesday afternoon even though two 15-yearold Morehead City youths put up a valiant battle. Leslie Bryan and Mike Clapsadl took turns trying to land whatever it was Leslie hooked, but lost it just as they got it to the top of the water after a two hour fight. About 100 onlookers watched the

boys as they waged their battle against the water creature. Of those who glimpsed it as it neared the surface on the final pull, most thought it was a skate that would easily have weighed 75 pounds. The boys were using a live spot

The board considering all the evidence taken in the three days of testimony consists of Captain Bresnan; Lt. Cdr. L. W. Goddu, Coast Guard Marine Inspection Service, Wilmington, and Lt. Cdr. Harry Gardner, Coast Guard Marine Inspection Service, Wilmington.

#### **Army Engineers Call** For Dredging Bids

Wilmington-Col. R. P. Davidn, district engineer, Corps of Engineers, has announced that bids are scheduled to be opened in his office Oct. 24, 1961 for main-tenance dredging at Manteo (Shal-lowbag) Bay, N. C. The work to be done consists of

the removal and disposal of all shoal material lying above the plane of 12 feet below mean low water in the channels between Wancese, N. C., and the gorge in Oregon Inlet. The quantity of material to be removed is estimated to be approximately 300,000 cubic vards.

Colonel Davidson stated that bids under this procurement are solicited from small business concerns only and that the procurement is to be awarded only to one or more
