

Only one oil is good enough for household equipment, says chemist

Chemists, mechanics and lubrication experts say only one kind of oil is good enough for your expensive mechanical devices—the best. To get best results from your sewing machine, vacuum cleaner, lawn mower, washer, electric fan, refrigerator and other household appliances, you should use an oil that not only lubricates, but also cleans and protects.

OLDER PEOPLE Must watch Bowels Constantly!

As we grow older the bowels become more sluggish. They don't get rid of all the wastes. Some days they do not move at all. So older people need to watch their bowels constantly. Only by doing this can they hope to avoid the many forms of sickness caused by constipation.

POULTRY SPROUTED OATS ARE EXCELLENT

Care Must Be Exercised That Hulls Do Not Impact.

Sprouted oats make an excellent poultry food. When sprouted oats are fed, whole oats can be left out of the scratch grain with advantage. In feeding whole oats, the hulls often cause impacted crops and death ensue.

In sprouting oats a temperature of at least 55 degrees is required. The growth will be more rapid if the high or low temperature is provided. Oats can be sprouted in the dark if the temperature is right. If sprouted in a dark room, the top growth will be light in color, but air day's exposure to light and air will give the green color.

Grain Supplements Are Needed by Laying Hens Laying hens must have their rations of whole and ground grains supplemented with protein concentrates, otherwise they will be leaner and not layers due to no fault of the hen but of the feeder.

Keep Poultry Houses Warm During Winter It is important for egg production that the poultry house be kept reasonably warm and well ventilated. Heavy paper or half-penny roofing and matched siding outside of grading, paper and sheathing, commercial insulation or plaster, or plaster base and stucco inside, and sawdust, gravel, chopped hay or straw between studdings to break up the air space, makes a frame house warm.

Poultry Hints Guinea are noisy enough to scare away poultry thieves. If pullets start to lay too soon they will seldom be fully feathered or full grown.

Older people must watch bowels constantly. As we grow older the bowels become more sluggish. They don't get rid of all the wastes. Some days they do not move at all.

Direct sunlight and green feed are the final factors determining the hatchability of eggs from healthy, vigorous, properly mated fowls. The value of succulent feeds such as mangel roots, cabbage and sprouted oats, is difficult to measure; nevertheless they are important in the ration.

Way to Get At a Cold Is Through the Bowels

As soon as you catch cold, the pores close; perspiration is checked. Gases and waste can't escape through the skin. That's why your doctor's first advice in case of colds is a mild laxative like cascara. Medical authorities agree it actually gets cascara in its most pleasant form in candy Cascarets.

FEW REASONS FOR TEST VARIATIONS

Cream Separator May Be Blamed for Differences.

When cream tests vary there is usually a reason, and before doubling the test it is well to consider the things that will cause the differences. E. S. Guthrie of the department of dairy industry at Cornell University.

A difference of ten turns each minute on the separator crank will change the test nearly three and a half per cent. The temperature of the milk at the time of separation, if at 70 degrees instead of 90, lowers the cream test and tests more fat in the skim milk.
