A LECTURE By Judge Leon McCord, Montgomery, Ala.

The papers carried the story the other day of a man, who forty years ago, killed a man and ran away. He was captured and returned to the north Alabama prison. He came clear. The interesting part of the story was that this man had been running away from this trial these years. He had been running away from the crime which he had committed. The fact is he had been a prisoner all these years, but he had made up his mind to get out. He had been in jail all these years, but he had made up his mind to get out. He had been in jail all these years, but he had made up his mind to get out. He had been in jail all these years, but he had made up his mind to get out.

Made the Doctor Stutter
I want to get you an advertisement into the hands of every farmer in the county. A patent medicine spider in an Oklahoma town told their crowd around his stand preparatory to selling them his medicine, "special advertising price."

Work for Farmers.
Governor Caulfield's suggestion that farmers be given all the employment possible in road building is sound sense. Of course, the securing of cheap and general farm work must not be neglected, but if opportunity is presented, hard-labor farmers to earn money for fuel purchase, it will be good sense.

Swiss.
The election is over and some are trying to forget by getting their corn in the crib.

Tax Waste.
Farmers will react favorably to the suggestion of J. Clyde Hoffman, chairman of the Indiana tax survey committee that means should be devised for eliminating waste and reducing governmental expense as a means of offsetting the tax burden. A tax relief bill which would become effective in saving the tax dollar, declares Mr. Hoffman, to provide other means of raising tax sums is not a good one.
