ing, good care and treat-all the rest of the country ment of all flocks Yancey combined. For the 5-year county farm families will period, 1936-1940, there do their part in producing was an average of over Seven boys and girls more food and feed to whip 42,000 forest fires a year in the South, on protected land. Including unprotected land, there was an average of over 160,000 forest fires a year, covering an area of 29 million acres and doing more than Thirty Million Dollars damage.

What man causes, man can prevent. The best way to fight forest fires, State Forester J. S. Holmes points out, is to not have any forest fires, to stop them before they start. The goal of forest fire prevention can only be obtained, by making every person

in North Carolina fores fire conscious, by instilling in every citizen a sense
