BOOKLET TELLS OF SOLDIERS' DEPENDENTS AND WELFARE

Atlanta, Ga., Nov. 15.—A booklet giving information concerning provisions made under the law covering Army regulations and instructions for the welfare, protection and security of soldiers' dependents, is announced by the War Department to the south-eastern states today through headquarters, Fourth Service Command.

The booklet, entitled "Personal Affairs of Military Personnel and Their Dependents," will be distributed in the Army so that every soldier will have access to it, including those already in the service and others as they enter. Dependents and others desiring copies of the booklet may obtain them by writing to the Superintendent of Documents, Washington D. C. and enclosing 10 cents to cover the cost of printing.

Information carried in the booklet includes allotment of pay and deductions; pay, allowances and allotments of personnel reported missing, missing in action or captured; joint bank accounts, medical attendance and hospital facilities for dependents and covers countless other points about the welfare of the soldier and those he left behind.

CERTAIN TYPES OF LIME INJURIOUS TO POULTRY

A warning to farmers that certain types of lime and liming materials are unsuitable for poultry work is issued by C. F. Parrish, head of the Extension poultry office at N. C. State College. He says, "there is misconception on the part of some farmers as to lime and liming materials, and how to use them in relation to poultry work."

Lump lime, burned lime, builders lime, and caustic lime are all unsuitable, Parrish said. These are all calcium oxide. The same applies to hydrated lime, water slaked lime, and agricultural lime, which are prepared by adding water to the four types first named.

"This material," said the Extension leader, "is caustic and, if used on floors or runs, may cause injury to the bird's feet. When used with poultry manure, the loss of nitrogen in the manure will result."

The most commonly used types of lime in poultry work, all of which are useful, are: Ground limestone, agricultural limestone (not to be confused with agricultural lime), air slaked lime, precipitated lime ground oyster shells, and marl.

Also recommended, in the order named, are: Basic furnace-slag, Gypsum or landplaster, and wood ashes. These limes are often added to chicken manure by poultrymen with the thought in mind of conserving nitrogen. However, says Parrish, it would be preferable to add superphosphate at the rate of 2 pounds per day to the manure produced by each 100 hens.

Lime is not a good germicide, said Parrish, but it is a good deodorant to aid

Ev'rybody Ev'ry Pay Day

6,000,000 Women Enrolled in War Savings Payroll Plan.

WASHINGTON, D. C.—Women At War Week, opening Nov. 22, during which women will seek to sell the greatest single week's volume of War Bonds and Stamps will serve to put the spotlight on the mighty contribution women generally are making toward financing the war.

Six million women are on War Savings payroll plans. Their monthly deductions total \$70,000,000.

The customers of 300,000 newspaper boys who have sold more than \$50,000,000 in War Bonds and Stamps are mostly women.

Volunteer saleswomen run nearly all the Bond booths in theatres from Maine to California. They also are sparking the War Bond sales in retail stores.

Ralph G. Engelsman, Associate Field Director of the payroll savings section of the War Savings Staff, readily admits that without the support of women the phenomenal record of payroll savings enrollments would not have been achieved. Payroll savings plans are now in operation in 143,000 businesses and factories. Employees of twenty-five thousand of these firms are converting at least 10 percent of gross payrolls into War Bonds every payday.

Associate Field Director Engelsman says that women have contributed directly and indirectly toward this record. When a man devoted 10 or more percent of his pay envelope to War bonds, the woman at home has had a powerful voice in the decision. Her planning, her economies and her cheerfulness play their part in the success of payroll savings.

The Treasury Department is counting upon this woman influence in its current campaign to "top that 10 percent by New Year's." By the first of the year the Treasury hopes to enroll at least 3,000,000 women workers in a payroll savings plan

'This Is My Fight Too'

Proud of her investment in the American way of life and equally proud of the grim war production on her face and arms, the young lady in this "Women At War Week" poster symbolizes two of the chief activities of women at war.

and 5,000,000 more men with total deductions for War Bonds over the 10 percent mark.

MISSION STUDY CLASS

The Baptist Missionary Society will have the Mission study class on Monday evening, Nov. 23 at 7:30 o'clock.

The book which will be studied is "If Two Agree". Mrs. Baker will teach the class.

OCTOBER TRAFFIC SHOWS SLIGHT INCREASE

Raleigh, N. C. Automotive traffic on the State highways of North Carolina showed a slight increase during October as compared with the tabulation for September, according to traffic counter reports computed by James S. Burch, Statistics and Planning Engineer for the North Carolina State Highway and Public Works Commission.

October traffic is still 45.5 per cent below what it was during the same month last year as compared with a 47.8 per cent decline during September.

Burch attributed the slight increase to farm traffic resulting from larger crops and better prices. He also disclosed there were twice as many buses on the highways as there were last year and considerably more trucks.

"This will represent the last increase in traffic for the duration," Burch predicted. "With ODT order 21 calling for war need certificates for all trucks, traffic in the State will take a large drop after November 15, when the new order went into effect."

NOTICE

A "Mt. Mitchell Jamboree" will be held at the court house on Monday night, Nov. 23. Musicians from over Western North Carolina will take part in the interesting program of music and singing.

Cash income from farm marketings increased slightly more than usual from August to September.

in eliminating objectionable odors. It will not aid to any great extent in destroying infection on poultry ranges.

NEW AUTO TAG IS 1-10TH AS LARGE—BUT TWICE AS HARD TO BUY THIS YEAR

Raleigh, N. C., Nov. 1942. Although Tar Heel auto owners will get only one tiny slip of precious metal for an auto tag—instead of the formidable two large tags of previous years—they will go to twice as much trouble and spend three times as much time in getting them. And they'll cost just as much.

Consequently, it is anticipated that tens of thousands of last-minute applicants may be careless as well as gasless January 1st, according to the N. C. Motor Vehicle Department, which is rather frantically trying to warn motorists to start buying their tags on Dec. 1, first day of sales.

In the first place, no 1943 tags will be issued until the motorist has turned in his 1942 registration card. If the motorist has lost his 1942 card, there is only one way to get it replaced—via the Motor Vehicle office in Raleigh. Branch offices of the Carolina Motor Club, which is handling sales in about 60 cities, are forbidden to issue replacements for lost 1942 cards.

This is the first year the autoist has had to turn in his last year's card, and officials estimate that some thousands of Tar Heels will suddenly discover that they do not have one. They recommend that motorists check now to see if they have such a card, and, if not, to make application for replacement immediately.

Their concern over this comes from the experience they had during the OPA gasoline registration. At that time, some 40,000 North Carolinians discovered they had lost their 1942 registration cards, and the Raleigh Motor Vehicle office was flooded for weeks with applications for replacements. At one time, around 1,000 letters and telegrams were being received each day, said Boddie Ward, Chief of the Bureau.

Must List Occupation In the second place, each

NAVY BEGINS SPECIAL ENLISTMENT CAMPAIGN

Recruiting Officer Here November 24-25

The Navy will begin an intensive enlistment campaign in this section, with George F. Ball, C. Sp., U. S. N. R., in charge of recruiting. He plans to be here on Nov. 24-25 and Dec. 1-2 in the court house. Other dates will be announced later.

applicant's occupation must be written on the second of the four cards of the new registration strip—also a new step to save time when the 1943 cards are received, applicants are asked to write their occupation right above the line "Alphabetical file" which appears on the bottom of the second card. This is a requirement of the War Department this year.

With those things done already, the applicant presents himself to the nearest license sale branch. There, the clerk will fill into the blanks the old 1942 license plate number, which, of course, the motorist retains for another year. The 1942 pocket card itself is left with the clerk.

The tab the applicant will receive will be affixed to the rear license plate, but the front license plate must also be retained. Do not, caution the Motor Vehicle officials, throw away either of your old plates, you still have the same old number that you had in 1942.

PLAN FOR COLLECTING HOSIERY STARTS NOV. 16

We have been requested by the Navy and War Dept's. to provide through salvage large stocks of silk and nylon. These are essential in the production of certain war materials and present supplies are limited. Hence we are appealing to American women asking them to donate all women's worn out, discarded, washed stockings containing silk or nylon.

These hose may be taken to Edges Dept. Store and Young and Westalls Store in Burnsville where containers are placed.

To answer some of the questions that will arise, the following is a brief question and answer schedule that may prove to be helpful:

- Q. For what will silk be used?
 - A. For manufacture of powder bags.
- Q. What are powder bags?
 - A. They are used by the armed services and are woven silk bags into which charges of powder are placed for generating the powder required to expel a shell from guns of major calibre. They are placed in the breech of the gun.
- Q. Can silk alone be used for powder bags?
 - A. Yes, silk alone burns completely and leaves no hot embers.
 - S. Why can't Nylon be used for powder bags?
 - A. Because heat to nylon results in a gummy sub-

COUNTY CONFERENCE WILL BE HELD AT BAPTIST CHURCH

The associational conference conducted by the Training Union Department will be held at the Burnsville Baptist church on Tuesday, Nov. 24.

The afternoon session will begin at 5:30 and is for the associational officers.

The evening session will begin at 7:30 and all those from county churches who are interested are invited to attend. Miss Margaret Sparks field worker from the state department, will attend the meeting.

stance and will not burn completely—it melts rather than ignites.

Q. For what do they use nylon?

- A. They use nylon for the manufacture of other war materials.

Q. How many stockings are needed to make up a 100 lb. case?

- A. Approximately 1500 pairs silk or 2300 pair nylon.

It is hoped that women in Yancey county will cooperate in turning in old discarded silk and nylon hose.

Helen R. Goodman, Chm. Salvage Committee.
