PULPWOOD POUNDS  
GATES OF BERLIN

General Eisenhower is authority for the statement that 5,000 rounds of ammunition are being poured into German defenses on the western front every minute. Six million rounds of artillery fire and 2,000,000 rounds of mortar fire are being hurled at the Nazis each month.

That's a lot of gun powder and explosives, and it took a lot of pulpwood to manufacture it. Pulpwood now makes 80 percent of the smokeless powder used by our armed forces.

While pulpwood producers may feel justly proud of their part in blasting the Nazi fortresses, they should also heed the plea of General Eisenhower for even greater production on the Home Front:

"Unless everyone all the way through the nation, those at the front and those at home, keeps on the job everlastingly and with mounting intensity we are only postponing the day of victory," he said.

As a No. 1 war material pulpwood is playing a vital role in the Allied advances in Europe and in the Pacific. But this is no time for over-optimism.

"We cannot all fight the enemy face to face," said our President.

But there are two things we can do: Buy more War Bonds and cut more pulpwood.

# A Prayer

Across the world the sound of shells has ceased ...  
And quiet shrouds the battle-rubbed West ...  
The enemy has laid away his arms, and Death and Pain  
are done in France.  
But I go on ... for I must fight and kill ...  
And work and sweat ... and hide and run ...  
For here the enemy is very much alive ...

His bullets still are made of lead ...  
Their angry whispers still foretell of sudden death  
For me and others crouched in slime and mud ...  
The end for us is yet to come ...  
And so we pray to God to give us strength  
To fight and win ... without the waste of Time ...  
And with His Will ... to see our homes again.
