Health Department News

The Health Officer has recently completed the physical examination of the First and Third grade pupils in all schools in the three counties.

The following reports have been made: 2267 children were examined, 1498 were referred to their physician or dentist for the correction of physical defects. Dental defects head the list of abnormalities. Next are enlarged and infected tonsils and enlarged adenoids.

Parents should realize the importance of these examinations. Many of these children have never been examined by a physician, and some few cases of valvular heart disease were found. These are so serious that the nurses visit the parents of these children to explain this defect and to urge that the children be taken to their private physician at once. In our opinion, almost one hundred percent of these cases of heart disease, as well as cases of Rheumatism, Rheumatic fever, St. Vitus dance, Arthritis, Bright's disease, and many other serious conditions arise from focal infection in the tonsils; and, less often, from abscessed teeth.

Many children have only slight arthritis when a joint will be sore for a day or two, then another joint will become involved. This frequently occurs without pain or soreness or swelling of the tonsils. Yet, the trouble is located in the tonsils in most cases from a low-grade infection, incapable of causing soreness or pain.

We find that in many cases of failures in school, the child misses too much school. If the parents only realized that nothing short of life and health is so important for a child to go to school every day, it would be a great advance.

The following children were found free of physical defects. We have not taken into account variations as to weight since parents vary markedly in size and the average is, to me, of only negligible significance. A great number of children were found to have only slight defects such as unclean teeth, or hands, slightly stooped shoulders, etc. We hope that by next year we will have a much larger number of children without defects. Congratulations to these children and their parents:

Christine Wilson, 3rd grade, and Jo Alice Wilson 1st grade, Bald Creek, daughters of Mr. and Mrs. Earl C. Wilson. Christine Barber, 3rd grade, daughter of Rev. and Mrs. F. R. Barber, Burnsville; Jimmie Laughrun, 1st grade, son of Mr. and Mrs. Paul Laughrun, Burnsville.

(Dr. B. B. McGuire).

PRE-SCHOOL CLINICS

Starting March 8th, the Health Department will hold the annual pre-school clinics in the schools. These clinics are for the children who will start to school next year. It is of vital importance that each child should have a complete physical examination before starting to school. If any defects are found they should be corrected as soon as possible so that the child can start the school year in good health.

Letters will be sent to parents who have children to enter school next year. Please note the hour and date carefully and be sure to bring or send your child.

EYE CLINIC

An eye clinic will be held at the Burnsville Health Department on March 21 and 22 if weather permits.

If you have a child that you think needs glasses, please bring him into the Health Department to have his eyes tested on or before March 9th or 10th.

We can take only children. The quota for adults is already filled. District Health Officer.
