A Great Financial Bulwark For Our Own and Our Country's Future

One of the brightest facts of the war effort is that many billions of dollars have been saved and are now in possession of the people. Eighty-five million Americans have bought War Bonds and are hanging on to them and have seventy-five million bank accounts, too.

These savings can mean much to the future welfare of our country and ourselves. They will permit us

to spend more of our current income once goods become plentiful again. The savings themselves can be used to tide us over emergencies and for such things as new houses. Thus the savings of the war years and the months immediately ahead can contribute to demand for goods, busy factories and jobs here on. Save now while goods are scarce and the threat of rising prices continues. Buy Victory Bonds.
