VALVE-IN-HEAD is far ahead!

in performance and economy... in ruggedness and reliability!

1 In the world's champion Chevrolet engine, the valves are located in the head of the cylinder, directly over the pistons... hence the name, Valve-in-Head.

2 Valve-in-Head design provides faster intake of fuel mixture... and quicker and more complete exhaust of burned gases... all of which contributes to better performance and economy.

3 Valve-in-Head design also permits a more compact combustion chamber; and this, together with Chevrolet's "Blue Flame" combustion, means more driving power for the pistons—less heat loss—and maximum economy.

CHEVROLET Automotive experts and millions of motorists agree: Valve-in-Head is far ahead because it gives an outstanding combination of performance, endurance, dependability and economy... Chevrolet—master builder of this master motor—has proved this by producing more than 20 million Valve-in-Head engines during the past thirty-seven years—engines which hold the distinction of having delivered more billions of miles of satisfaction, to more owners, over a longer period, than any other power-plant built today! Chevrolet's World's Champion Valve-in-Head engine is another powerful reason why CHEVROLET AND ONLY CHEVROLET IS FIRST... another convincing proof that only Chevrolet gives BIG-CAR QUALITY AT LOWEST COST!

IN MEMORIAM

(In loving memory of our dear cousin, Rena Ray, who passed away Feb. 14, 1946).

Two years it's been since you have gone, And left us here, so sad and lone. We miss your sweet and smiling face, No one will ever take your place.

Memories keep you always near us; In our hearts you're always there too— God keep you safely up above, And may you rest in peace, dear one we loved.

(Mr. and Mrs. Carl C. Ray).
