## Health Department News

### Quarantine Is Lifted

Since there is some uncertainty as to the present status of the quarantine the District Health Officer wishes to state that all restrictions on children in this county have been lifted and that they are free to attend public gatherings.

However, until the number of cases in other parts of the state decreases, children under 16 from other counties must not enter this county without permission from the Health department, unless they are just passing through by car or bus. Such permission is not required in order for children to leave this county, but parents are again advised

not to take their children away from home, especially to places where there is much polio.

Young children, especially those below school age, should not be taken into crowded places, and they should get their full amount of sleep every night—from ten to twelve hours, according to age.

In the rest of this health district, Mitchell has still had only one case of polio, but Avery has had eight thus far—six of these since August 1. All of these recent cases are in the Asheville Orthopedic Home, where they are doing well. Only two have any paralysis or muscle weakness.
