

ROBERT SCHMITT
STATE COLLEGE

The time is at hand when we may expect light frost almost any night after the weather cools off. The first frosts usually occur in the low spots because the cold air, being heavier than warm air, will settle there. Very often after the first frost nips our fall flowers and tender vegetables there is a period of two or three weeks before another frost occurs. Therefore, it is desirable to do what we can to prevent damage by these early light frosts and so prolong our season.

It is well to keep the following facts in mind: light frosts will not occur on cloudy nights; frosts will not occur if a breeze is stirring the air; if your garden is so located that the cold air can move off to lower areas, it will probably escape damage from light frosts; if your garden is low and is surrounded by trees and shrubs so that the cold air cannot move out, you will probably have severe damage from the first frosts.

How can we prevent frost damage? That is not easy for the average gardener. The commercial fruit and flower grower may use sprinkler irrigation, oil heaters or large fans to do the job, but these are impracticable for the home garden. In California I saw large propeller fans used to stir up the air to prevent frost damage. In Minnesota I saw dahlias grown under a cheesecloth cover in order to protect from early frost and prolong the blooming season. These methods are effective but expensive.

On a frosty morning we often see choice chrysanthemums, dahlias and tomatoes covered with sheets of paper. Usually these covers are simply thrown over the plants. This is poor protection because the cover is in contact with the plant or flower. Wherever the

cloth or paper touches the plant or flower, frost damage will occur right through the cover. To be effective the cover must be held off of the plant by a framework or by stakes.

Turning the sprinkler on early in the morning when a light frost occurs will sometimes prevent or lessen the damage, but not always. I have also found that since the great increase in automobile traffic on the street along one side of my garden, my dahlias are seldom damaged by the first light frosts as they used to be a few years ago.

It pays to listen to radio weather reports, especially for early frost predictions.

MRS. BANKS ATTENDED HOME OFFICE SCHOOL

Mrs. Grace Banks, agent in the local office of the Imperial Life Insurance Company who resides at Burnsville returned last week from Asheville, North Carolina where she attended a special Home Office school. Mrs. Banks has been associated with Imperial for two years.

The special school was held for the purpose of training personnel in the new Formula Programing Methods designed by the Institute of Insurance-Marketing of Southern Methodist University at Dallas, Texas, thereby enabling her to render a more professional service to the insuring public.

The Company's Training Director, Mr. Clyde E. Teeter together with his most capable staff conducted the school.

A Salute

What is a pharmacist? He is a member of the "health team." His team-mates are the family doctors, specialists, nurses and hospital administrators who work for better community health.

He is the "scientist on the corner." He is that unique storekeeper who must have a college degree in pharmacy and pass the rigid examination of the State Board of Pharmacy in order to win the honored title of "Registered Pharmacist." But he does not stop there. Through professional journals and meetings he is up to date on the latest research and developments in pharmacy and medicine.

He is the physician's colleague and trusted aide. In direct contact with drug manufacturers, he helps keep the busy physician informed on the hundreds of new prescription drugs developed each year.

He is the physician's "warehouse." He must stock every drug that may be prescribed by the doctors he serves... medicines for hay fever, arthritis, the common cold... thousands of them. Many resemble one another, but there are no substitutes. The pharmacist fills every prescription exactly as ordered.

He is a good neighbor. He knows and likes his customers. He values their friendship and confidence in his professional skill—that skill which stands always dedicated to the well-being of his neighbors.

He is a public servant. President Eisenhower, in proclaiming National Pharmacy Week, has called attention to "the splendid services rendered by the pharmacists of America to the health of our people."

Because the pharmacist is all these things, he deserves a tribute of thanks for his devoted and indispensable service throughout the year.

Brazil's Senate building in Rio de Janeiro once was one of the show places of St. Louis, Mo. Ornate Monroe Palace, named for the fifth President of the United States, housed Brazil's exhibits at the St. Louis Exposition in 1904. It was disassembled, moved to Rio, and reconstructed there.

From 1886 when nickel was first produced in Canada to the end of 1955, the free world's production of the metal has been 8,500,000,000 pounds of which Canada has accounted for 84 per cent. In 1955, the combined total deliveries of nickel by Canadian producers were at a record high estimated at 387,000,000 pounds, representing somewhat over 80 per cent of the free world supplies.

NOTICE OF SALE UNDER DEED OF TRUST

By virtue of the the power of sale contained in a certain deed of trust executed by Ray Boone and wife, Lillian Boone, dated March 15, 1954, and recorded in the Registry of Yancey County, N. C., in Book No. 33, page 199, to secure the indebtedness therein named, and the Trustee therein named having been requested to exercise the power of sale therein, the undersigned Trustee, will on the 29th day of October, 1956, at 11 o'clock A. M., at the court house door in Burnsville, N. C., offer for sale, for cash, to the highest bidder the following described real estate, situate in Crabtree Township, Yancey County, N. C. and bounded as follows:

Beginning on an apple tree on the south side of the State Highway, and runs south 27° west .19 poles, crossing Crabtree Creek, to a small maple; thence down and with the said Creek 12 poles to the line of the Griffith heirs; thence with said line recrossing the creek 10 poles to a stake at State Highway No. 69 (U S 19E); thence westerly up and with said Highway to the beginning, containing 1 acre, more or less.

Excepting the right of way for the old 14 foot road as presently located, leading from an apple tree to the creek and Tom Boone's land.

Together with all heating, plumbing, cooling, air conditioning and lighting fixtures and equipment nor attached to or used in connection with the said real estate.

This the 26th day of Sept. 1956. Mary C. O'Donnell, Trustee Charles Hughes, Attorney Oct. 4, 11, 18, 25

YOUR brain budget

1. An antiquary is (a) an old person; (b) authority on relics; (c) museum.
2. Anthropomorphic means (a) before history; (b) like man; (c) four-legged.
3. A gouache is (a) a cowboy; (b) temple; (c) painting.

ANSWERS

1. Authority on relics.
2. Like man.
3. Painting.

LOOKS GOOD!

It is good! It's 'SO' DAIRY!
Unmatched in its field!

Get your hands into a bag of Spartan Quality Dairy, and you'll agree "MAN, WHAT FEED!" You'll see those big, Crimped Oats... those Crunchy Pellets (contain fine materials)... that tasty Beet Pulp and Wheat Bran... all "cow-flavored" with fine-spray Molasses. Cows love it! And dairymen quickly get sold on its milk-making and money-making power. This feed is built to produce!

Here's why Blue Chip GMC's cost less to own

It's no secret that GMC Blue Chip haulers consistently outperform their class. Now read why they're also the lowest-cost trucks on anybody's books

Better gas mileage
High-compression engines teamed with high-efficiency gear ratios produce maximum fuel efficiency.

Balanced power trains
Transmissions, axles and power plants are matched. Teamed for specific needs, they're more than equal to the job.

Less down-time
Thanks to the truck industry's most advanced engineering, GMC Blue Chip repair needs are the lowest of all, according to accredited fleet records. GMC trucks stay on the job!

Hydra-Matic* savings
Best-proved of all automatic transmissions, Hydra-Matic

Drive prevents fuel waste, cushions shock-loading, cuts traffic time, saves tires, spares drivers. GMC is the only truck manufacturer with Hydra-Matic Drive in its full line!

Worth more on trade-in
In better condition after five or six years' work—with their advanced styling that keeps them looking young—Blue Chip GMC's command top resale value. After writing off their original cost, they STILL absorb a big part of their replacement expense!
*Optional at extra cost

Record-Breakers in Their Class.
GMC's F370, at 19,500 GVW, and the 450 at 22,000, are famous for fast-paced, low-cost work in the construction, city delivery and general hauling fields.
