ELECTRONIC PROCESSING of information supplied by architect-engineer survey teams on potential fallout shelters assures that this data will be compiled and supplied more quickly to civil defense officials. Using Federally furnished shelter supplies, CD authorities will mark and stock shelter areas located and reported in the survey. Technicians are shown transferring microfilmed survey data to magnetic tape in the U.S. Census Bureau headquarters at Suitland, Md., so the information can be run through computers. (Dept. of Defense Photo)

Checking shelter potential of limestone cave near Kansas City, Mo.

**SHELTER PROGRESS RAPID**  
The national civil defense program of surveying fallout shelters for up to 60 million Americans is ahead of schedule, and should be completed before the end of 1962, according to officials of the Defense Department's Office of Civil Defense. By October 1 OCD expects to have in the hands of local civil defense authorities complete information on the number and location of shelter spaces available in each community. From information obtained by the Federally-financed National Shelter Survey, local civil defense officials will know also how many persons in each community could be sheltered, how many could not be sheltered under present conditions, what additional space could be modified into shelter areas, how much it would cost, and similar data. Local architects and engineers surveyed shelter areas under contract to the Army Corps of Engineers or the Navy Bureau of Yards and Docks. Under present plans, civil defense authorities receiving this information would then be responsible for marking shelter areas with a nationally-standardized sign. They would stock shelter areas with specially-prepared 14-day supplies of food, water, sanitation and medical items, and fallout detection instruments—all provided by OCD. The shelter survey, marking, and stocking program, announced last August and put in operation Dec. 1, 1961, is the first part of a broader plan to provide fallout shelters for virtually all Americans over the next five years.

### Creamy-Rich Ice Cream... Made with Ease

With the coming of days that are warmer, thoughts turn to cool, refreshing desserts. First on the list of favorites is homemade ice cream. Grandmother used to spend hours turning the crank of her ice cream freezer, but the modern homemaker can rely on Carnation Company's Home Economists who have developed an ice cream recipe that is creamy and rich... but so easy to prepare. The secret is evaporated milk... whipped and blended with marshmallow whip and fruits. Evaporated milk insures a smooth texture every time... no need to worry about iciness. It's extra nutritious, too... with twice the amounts of Vitamin D, protein and minerals of whole milk.

**HOMEMADE PEACH 'N' STRAWBERRY ICE CREAM**  
(Makes about 2 1/2 quarts)  
1 cup sliced fresh peaches  
1 cup sliced fresh California strawberries  
1/2 cup sugar  
2 1/2 cups (7 1/2 to 8 ounce jar) marshmallow whip  
2 1/2 cups (large can) undiluted evaporated milk  
1/2 cup lemon juice  
Whole fresh California strawberries  
Peach peaches and 1 cup sliced strawberries in bowl. Add sugar and marshmallow whip. Allow to stand for 25 minutes. Stir occasionally until well blended. Chill evaporated milk in refrigerator tray until cold. Ice crystals form around edges of tray (about 25 to 30 minutes). Whip evaporated milk until stiff (about 2 minutes).

Photograph courtesy of Carnation Company. Add lemon juice. Whip very stiff (about 2 minutes longer). Fold peach mixture into whipped evaporated milk. Spoon into refrigerator trays. Freeze until firm. (about 3 hours). Serve garnished with whole strawberries. \*or 1 1/2-ounce package frozen sliced peaches and 1 10-ounce package frozen sliced strawberries, thawed (omit sugar).
