Shrinks Hemorrhoids Without Surgery

Stops Itch—Relieves Pain

For the first time science has found a new healing substance with the astonishing ability to shrink hemorrhoids and to relieve pain—without surgery. In case after case, while gently relieving pain, actual reduction (shrinkage) took place. Most amazing of all—results were so thorough that sufferers made astonishing statements like "It has ceased to be a problem!" The secret is a new healing substance (Bio-Dyne®)—discovery of a world-famous research institute. This substance is now available in suppository or ointment form called Preparation H®. At all drug counters.

Electronic Nurses' Aid Developed

To alleviate the chronic shortages of hospital nurses, Japanese medical and electronic scientists have developed a system which automatically records the pulse and temperature of in-patients. Four times daily, the patient places a thermometer in his mouth and fits a cap-like terminal of a pulse gauge onto his little finger. The readings are transmitted to a central electronic monitoring board, and coupled with the patient's bed number, are processed in an electronic computer and into typewritten sheets within minutes. The "Auto Nurse" is credited with saving 12 hours of nurses' time per 100 patients daily.
