Miss Tipton is a graduate of Cane River High School, Class of 1964.

Warren Wilson College is owned and operated by the Board of National Missions, United Presbyterian Church, U. S. A.

Fender Promoted

To Specialist Four

FORT HOOD, TEX. (AHT-NC)—Clark F. Fender, son of Mr. and Mrs. Raleigh Fender, Rt. 4, Box 147, Burnsville, N. C., was promoted to specialist four, Sept. 14, while serving with the 2d Armored Division at Fort Hood, Tex.

Specialist Clark, a parts clerk in Headquarters Company of the division's 17th Engineer Battalion, entered the Army in May 1964 and completed basic combat training at Fort Knox, Ky.

The 22-year-old soldier is a 1960 graduate of Cane River High School.

Girl Scout Field

Meetings To Be

Held Oct. 4

The Neighborhood Service Teams for Girl Scout activities in Yancey County will join service teams from 25 neighborhoods in 16 Western North Carolina counties at the first field meeting of all neighborhoods on October 4 from 10:00 a. m. to 2:00 p. m. in the Canton Y. M. C. A.

Mrs. Tania Rollman, field Vice-President of the Pisgah Council, explained the change from district meetings which were held formerly in the council and new plan whereby volunteer workers from each neighborhood will meet together twice each year. Between meetings the neighborhood teams which work with troops in organizing, helping with program and other services in the community, will work closely with the district advisors of the council staff who are assigned to the neighborhoods. The field vice chairman said she felt the new plan will bring the neighborhood personnel into a closer association with the board of directors and help the many areas of the council work in a more coordinated manner. Mrs. O. A. Gregory of Marshall is council president.

Mrs. John Plemmons of Canton is hostess for the meeting which more than 100 volunteer workers are expected to attend. The program will re-interpret the responsibility of the board's services to the neighborhood. A report of neighborhood plans and requests for service has been compiled and compared with plans for the year to ascertain whether the needs of the individual communities are being met. A session on problem solving will be held by the neighborhood teams which include the chairman, troop consultants, troop organizers, camping consultants and public relations representatives.

The traditional "nosebag lunch" which Girl Scout troops often feature will be a part of the program with representatives bringing a packed lunch.

Mrs. Jack Edwards of the Pisgah Council staff, field advisor for Avery, Madison, Mitchell and Yancey counties, will attend a workshop on "Reaching Girls in the Mountain" in Berea, Kentucky on September 22-25.

Mrs. Elizabeth Alley, another staff member, will also attend and be a consultant at the conference which is sponsored by the National Girl Scout Organization and the Council of Southern Mountains. Volunteers and Staff members from 11 states in Appalachia will attend the workshop which will include sessions with representatives of many agencies in the mountains, sharing their successes and problems, a session on Federal Legislation and government agencies working in the Appalachian Highlands, and some sampling of the culture of the Southern Mountains.

Some statistics have been compiled from the 16 counties of the Pisgah Council showing the highest Girl Scout membership in the 7 to 17 age group being 23 per cent in Transylvania County and 22 per cent in Macon

GARDEN TIME

BY: M. E. GARDNER

It is bulb planting time. How do you rate bulbs in your garden? Many think that no flowers are more welcome than those produced by bulbs because they appear early in the spring and continue to bloom until golden bell and other early flowering shrubs take over. They are comparatively easy to grow and are adapted to so many situations around the home — in the garden, in the flower borders and naturalized among trees or other suitable locations.

The soil should be well prepared. This may be done by deep spading or with a tiller. Work in organic matter if you have it, along with fertilizer.

It is rather difficult to make fertilizer recommendations because the kind and amount applied will depend upon the general physical condition of your soil and whether it is light or heavy. A suggestion or two might help.

Bone meal is good. Use about four pounds per 100 square feet. Use the same amount of dolomitic limestone and work both into the soil to a depth of at least six inches.

A complete fertilizer is always good because you have a better plant food balance. The most commonly used mixture is 8(N)-8(P)-8(K). Use a liberal sprinkling of 8-8-8 over the area to be planted, also a liberal sprinkling of dolomitic limestone. Incorporate with soil as suggested for bone meal.

There is good reason for deep placement of fertilizer because calcium and phosphorus do not move readily in the soil. For this reason plants cannot absorb these two important nutrient elements unless they are placed in the root zone.

Dolomitic limestone is recommended because it contains magnesium. This element is essential for satisfactory plant growth because it has much to do with the manufacture of chlorophyll, the green coloring matter in leaves.

The depth of planting will depend upon the kind of bulb. A general rule is to cover the bulbs with soil to a depth equal to three times the diameter of the bulb. The exact depth is not a matter of too much concern because a variation of an inch or two will do no great harm.

Plant a little deeper than suggested in very sandy soils and not so deep in the heavy clays.

County. Avery County has 15 per cent of girls in this age group in Scouting with an average age of 11. Madison has 12 per cent and an average age of 10; McDowell has 13 per cent in Scouting and an average age of 11; Yancey has 10 per cent in Scouting and an average age of 12.

CHEVY'S BUILT FOR BIGGER THINGS IN '66!

NEW CHEVROLET WORKPOWER IS HERE!

Here's low-cost Chevy-Van—economy champ of Chevrolet's long, strong covered delivery truck line.

Telephone your Chevrolet dealer about any type of truck.

Franchised Dealer No. 1019

32 1114

ROBERTS CHEVROLET - BUICK, Inc.

West Main Street, Burnsville N.C.

Manufacturer's License No. 110

NEW HEAVYWEIGHTS UP TO 65,000 LBS. GCW!

The all-new Series 70000 and 80000 models are here—the biggest Chevies ever built, out to do the biggest jobs any Chevrolet trucks have ever done! They're ready to cut costs with new V6 gasoline engines, new V6 and V8 diesels. They offer, also, a new 92" cab that's the best yet for working efficiency, new higher capacity frames and axles and a high 65,000-lb. GCW rating.
