Micaville To Burnsville Road To Get Final Surface

Long a forgotten link, after the road bed was completed in 1963 the section of US 19-E from Micaville to Burnsville is soon to receive a new layer of skin.

Dickerson Inc. of Monroe is the apparent low bidder for a bituminous concrete paving project that will include the final surfacing of the road connecting Micaville and Burnsville.

The new pavement will have a smooth surface comparable to the completed leg of US 19-E stretching from Micaville to Spruce Pine.

Ordinarily, a new road is given its final surfacing upon completion or no later than one year after road bed construction is finished.

Delays in completing the newest link of US 19-E in Yancey County, drawn out over a period of three years, now appear to be ended.

Indications are that paving will be done this spring or early summer, subject to the approval of Dickerson's low bid by the State Highway Commission.

An earlier bid for work on this project was turned down by the Highway Commission for exceeding the estimates set up by the Highway Department.

New Patina For Your Patio

"Suffering from shock and exposure." Will that be your diagnosis when you haul out your lawn and patio furniture for spring?

Well, it's not the end—much as it may look that way. Spring is the season of birth and beginning... and, when it comes to outdoor furniture, of finishing.

No matter how rusty or dilapidated, your metal or wood lawn furniture can be new again with a bright, fresh coat of easy-to-apply, weather resistant enamel. One of the easiest to apply and most durable is Acme's All Surface Enamel. This modern rust-inhibitive enamel will give new color and class to lounge chairs that sat through a long hot summer of bumps, scratches and spilled drinks.

Whatever outdoor furniture you're refinishing, you can make the job a "breeze" by collecting all your tools and materials before you start, say the Acme experts.

You'll save time and effort — and do a better paint job — if there's sandpaper, a sander, putty knife, paint-and-varnish remover, scraper, mixing bucket, drop cloths, and brushes all within easy reach. With the surface cleaned and sanded and holes or seams puttied, you're ready to apply the enamel.

For large pieces, wield that brush and can, but for small areas and irregular shapes—including filigree chairs and tables and wrought iron porch lattices—an aerosol can is handier. Most outdoor enamels, including Acme's All Surface Enamel, now come packaged in both convenient ways.

A little paint-up, fix-up effort during spring cleaning will have you singing "Summertime — and the livin' is easy," while lounging on sparkingly beautiful outdoor furniture.
