

WAMY WOMEN MAKE 'RED RIDING HOOD' DOLLS

MARKET, PACKING PLANT DISCUSSED FOR COUNTY

On Target Spring Cleaning

Women hard at work at W.A.M. Y. office learning to make "Red Riding Hood" dolls.

Yancey County may have a farmer's market soon if the goal is met that is being worked on now.

Farmers and business men of the county met last night to discuss the organization of a farmer's market, which would include a packing plant for fruit and vegetables grown in the county.

Dr. E. A. Proctor, Fruit and Vegetable Marketing Specialist from N. C. State University, was guest speaker.

The speaker pointed out that the tomato and bean program in the county has great possibilities here. Larger farm income may be realized if farmers of the county will grow the crops and cooperate with the agricultural agencies, he said.

After hearing the State and County Agricultural officials, Mr. Thomas F. Byrd offered a resolution that a temporary organization be set up to get plans under way for the market and packing plant.

Rev. John Powers was elected as temporary chairman, with Albert Sutton as secretary.

It was voted to organize a

Yancey County Cooperative, with organization plans to be under the direction of informed State Agricultural representatives.

It was hoped that 125 members will join in the initial organization. Other meetings will be called at a later date, and it is anticipated that more farmers will attend and join.

It was pointed out that this could be a great opportunity for Yancey County farmers to improve their economy.

Madison County, it was said, marketed more than one and one half million dollars in tomatoes last year.

Approximately 90 acres of land has been designated by farmers to grow tomatoes in the county and others are expected to sign up for crops.

Although many plant beds have been damaged by cold, plants will be available, it was pointed out. The Extension Department has ordered thousands of tomato plants which may be purchased by farmers at \$7 per thousand. The plants were ordered from Georgia and are available now.

Spring is the time for evaluation—for taking stock of things from yourself to your home. This year, in your Spring cleaning, resolve to restore the good looks of your house by taking aim at problem areas. For example, if dirt-buried carpets are your problem, resurrect them by giving them a good shampooing. First vacuum, to remove the dust, then use a rotary shampooer to bring the nap back up on the rug and give it a new lease on life.

Bulging closets often need to be put on a diet. Slim them by eliminating all paraphernalia you no longer want or need. Or if you can't bear to part from certain odds and ends, organize them by arranging them in neatly stacked boxes.

Is there a villainous greasy stove in your life? Foil it, by using Pine-Sol household cleaning and disinfectant agent. This effective liquid cleans like steam, penetrating deeply to clear away all grease deposited by cooking vapors. And it deodorizes and disinfects too.

If the children—bless their little hearts—have gone creative all over the walls, resolve to wipe this matter up. Pine-Sol, an all-purpose liquid cleaner will help you solve this problem easily.

If you follow these tips, it'll be easier to lift that mop, tote that broom and wield that dustcloth more effectively. Clean up problem areas and you'll be on target for Spring cleaning.
