

Mayberry And McKinney Are United In Holy Matrimony

Miss Dixie Marsha Mayberry of Celso became the bride of Mr. Jerry Lee McKinney of Bakersville at

7:30 p.m. on December 20 in the Brown's Creek Baptist Church with Rev. Horace McLeroy and Rev. Jerry Lloyd

conducting the ceremony. The bride is the daughter of Mrs. Dixie C. Mayberry of Celso.

The bridegroom is the son of Mr. and Mrs. Grover McKinney of Bakersville.

A program of nuptial music was provided by Miss Kay Huskins.

Given in marriage by her brother, Ronald Mayberry, the bride was attired in an empire gown of Peau de Soie accented in imported Peau d'Ange. Chantilly lace sleeves and panels enhanced the A-line skirt and detachable chapel length train. She wore a tiered veil of silk illusion attached to a camelot cap of matching lace sprinkled with seed pearls.

Mrs. Patricia Garland of Brush Creek was her sister's matron of honor. She wore an empire floor-length dress of cherry red polyester crepe accented with neckline and sleeve ruffles and carried a single long-stemmed white rose.

Miss Rita McKinney, sister of the groom of Bakersville; Miss Emily Huskins of Micaville; Mrs. Denise Beach of Lincolnton; and Mrs. Ramona Dewitte of Blythe, California were bridesmaids. They wore gowns fashioned like that of the honor attendant and likewise carried a single long-stemmed rose.

Miss Paige Garland and Bart Garland were junior attendants.

Mr. McKinney was his son's best man. Tommy Mayberry of Double Island and Barry Mayberry of

Mrs. Jerry McKinney

Asheville, Jerry Garland of Brush Creek and Doran Ayers of Red Hill were ushers.

A reception was given in the fellowship hall of Celso United Methodist Church. Presiding at the bride's book was Mrs. Pat K. Mayberry.

Assisting at the reception were Mrs. Paul Hughes of Burnsville, Mrs. Patsy Mayberry of Double Island, Mrs. Thelma Loftis of Celso, Mrs. Aileen Anglin of Celso and Mrs. Carol Loftis of Celso. Mr. and Mrs. McKinney will live in Celso.

Boone, Presnell To Wed

Mr. and Mrs. Reece Boone of Route 2, Burnsville are glad to announce the engagement of their daughter, Teresa Ann Boone to Greg Presnell, son of Mr. and Mrs. Floyd Wilson of Route 2, Burnsville.

Wedding plans are incomplete at this time.

Teresa Boone

For And About Homemakers

A workshop offering advanced training in Macrame Wall Hangings is scheduled for Thursday, January 22, 9:30 a.m. to 3:00 p.m. at the Courthouse. Freida Terrell, Area Agent in Creative Crafts, will conduct the workshop for homemakers who received previous training in Creative knotting in November.

METRIC IN EVERYDAY USE

During January Extension Homemakers will become familiar with a system of measurements new to many Americans. Educational programs and materials have been used in the metric system, and to help them think of the application of metric terminology in their daily lives.

AFFECTS HOMEMAKERS
Homemakers will be affected in many ways—it may take: 60 liters of gas instead of 16 gallons to fill your car; a 2 kilogram roast instead of a 4½ pound one for your family, and an ideal figure will be one that measures 90-60-90; centimeters, that is, not inches.

The United States is one of the few countries in the world that is not committed to the metric system. Congress is considering legislation which will establish the metric system in the United States and set a time table for conversion to the new system. The more we learn about this system in advance the easier the changeover will be. The terms you learn today will help you be ready.

The metric system is expected to make calculations much simpler and easier to understand in the future when it totally eliminates the standard measurements now in use in the U.S. The system we currently use has developed by custom, and though it is standardized and regulated by the U.S. Dept. of Commerce, the common terms we use have little relationship to each other. Remember how you had to memorize the number of ounces in a quart, rods in a mile, pecks in a bushel?

The metric system uses some basic words upon which all the other terms are built. These are the "meter" for length, "liter" for volume, "gram" for weight, and "celsius" degrees for temperature. All other units are made from these terms—with a prefix to specify the exact unit of measure. The metric system is based upon multiples of ten just as our money system is. When water freezes at 0 degrees and water boils at 100 degrees, won't it be easy to remember?

CHANGE TAKES TIME
You will not have to learn all the terms at once. After legislation is passed by congress, a period of ten

years may be used in making all the necessary changes in business, industry and households. The National Education Association is already requesting that young children be taught the metric system as their primary language of measurement.

The most important suggestion now is that you learn to know the most common equivalents: a liter is just a little larger than a quart, and a meter is three inches longer than a yard. As you see the terms that refer to the metric system, begin to "Think Metric". Look for terms when you are shopping and it will help you to be ready when we have a "Metric America".

Individuals interested in more information on this subject, regardless of race, color, sex or national origin, should request same from the Yancey County Agricultural Extension Service 682-2113, or 682-6186, or Room 7, Courthouse, or attend an Extension Homemakers Club meeting. Programs in February will be on "Getting The Metric Feeling in Food Preservation".

Maria Carter

Celebrates Birthday

Maria Dawn Carter celebrated her first birthday on December 27, 1975. She is the daughter of Larry and Georgiana Carter of Rt. 3, Burnsville.

Grandparents are Mr. and Mrs. Merritt McPeters of Burnsville and Mr. and Mrs. B.M. Carter of Weaverville, N.C.

A little party was held in the home with family and grandparents.

Cabbage Carrot Slaw
Peanut Butter Cookie
Milk

What price Freedom?

OR HOW DO YOU pay off the WAR of Independence?

Our horses were running out of oats. Our soldiers, out of bullets. And the revolution, out of steam.

We needed some money fast, but the Continental Congress had no power to tax.

So we asked investors to pitch in. And they did. With over 27 million dollars.

Today, it costs even more to keep things running, to hold on to the freedom we won. And the way to pitch in now is through U.S. Savings Bonds.

And when you buy Bonds, you're not only helping your country, you're helping yourself.

Just sign up for the automatic Payroll Savings Plan at work.

Or buy Bonds at your bank.

U.S. Savings Bonds. A great way to keep our country, and you, in the running.

Take stock in America.

200 years at the same location.
