Off to a running start!

IN RECENT YEARS, the economic development of the South has set a mighty fast pace. According to a just-released U. S. Department of Commerce report, the South in the past decade raced ahead of the nation in rates of growth in 26 of the 31 industrial and commercial activities surveyed. Among these were such meaningful economic "yardsticks" as bank deposits, personal income, value of construction work and expenditures for new plants and equipment.

perhaps even exceed, the pace-setting growth of the past few years.

This is great news for all in the South. Sound diversified industrial expansion creates new wealth, new markets, new job openings a broader vocational opportunities that are particularly attractive to our trained young people encouraging them to remain in the South. Prosperity breeds prosperity - and everyone benefits. Let's all work together to make 1964 the "best year yet" for the South.

On the grow, electrically

One of our constant duties is planning ahead. It's a constant job because your needs for electricity increase year by year.

Perhaps you don't realize that you're using much more electricity now than in past years. You may not realize it because there's always been enough electricity available when you want it. You don't have to place an order and have it delivered a month or year later. No, we can't wait till the day you install a new appliance to start rebuilding. We've got to build and maintain an electric system that's ahead of your call.

We're glad you're using more electricity and keeping us on our toes. It's additional proof that our area is on the grow, electrically.

We're planning now to meet your future electrical needs. Tomorrow comes fast in our business.
