#### Planning Board Reviews Land Use, Hears Report On Town Subdivisions

MURPHY - Policies and plans by which land can be more efficiently used in Murphy are under review by the Murphy Planning Board.

In conjunction with technical work performed by staff personnel of the Western North Carolina Regional Planning Commission, members of the Board are examining mistakes made in the lay - out of streets and lots in the past, with the view toward recommending improvements for future growth.

At a special meeting of the Board last week, members heard from a study committee headed by F. O. Christopher, which has under review proposed standards for the development of subdivisions in the town.

The standards would insure that new roads and streets are of adequate width for the traffic they will handle, that building lots are of adequate size, and that certain im provements are made to land before it is offered for sale as a residential building site. Many communities in the state have adopted such re-

Before applying for a tag, vehicle owners must supply information about their insurance on the back of one of the cards. This information must include the name of the insuring company for the ve-hicle, the policy number and the date the policy becomes effective.

Mr. Johnson said that he kept a record of one morning's sales recently, and 15 out of 20 applicants didn't have the form properly filled out. Deadline for purchase of

1964 N. C. tags is Feb. 15. Tags for Cherokee County this year are numbered CZ-2901 to 7500.

Mr. Johnson urged vehicle owners to buy tags now and avoid the last-minute rush. Payment for tags must be in
