#### How To Make Your Clothes Last Longer

clothes and never have a thing to wear --- or spend a minimum and always look wellgroomed. Good grooming does end on your pocketbook ---it depends on your knowledge of how to make your clothes last.

The worst enemies your clothes have are dirt and per-

Dirt, even invisible dirt, weakens fabric, can spoil its shape, and attracts moths and Perspiration, be-

You can spend a fortune on cause of its acid nature, not only stains, but can actually rot fabrics. So the first rule for making garments last longer is to wash or dryclean them often, never allow them to go soiled from season to

> Drycleaning is what your best clothes usually require. If you take them to one of the do-it-yourself coin - operated drycleaning centers (often they are attached to a coin operated laundry center)

moment when the pictures of your children arrive from the portrait photographers.

Open. They're great! Make this wonderful discovery yourself. Bring your children in soon.

Show above is one of the largest tomatoe fields in Cherokee County. There are some 30,000 plants over an area of 5 acres. The tomatoe field is a project of the Cherokee County Development Corp. for the purpose of trying to induce the farmers in this area to grow a product that will give them a higher cash yield

it needn't be a financial drain --however, there are things you should know.

Here is a list of some annoying stains and what to do about them:

Tea and coffee stains: Stretch stained area over bowl and pour boiling water from a kettle onto it until stain is

Wine stains: Sprinkle with salt, then use boiling water

Soft drinks and alcoholic beverages: These stains don't show up at first but can turn brown after aging. They should be sponged with water or with detergent and water.

Fruit and berry stains: Never use soap---it sets the stain. Loosen fruit particles under cool water, then soak overnight in plain cool water, rub with detergent and launder as usual. If necessary bleach with hydrogen peroxide --- in one to eight proportions --for whites. Test before you bleach for color fastness.

Cherry, peach, plumb, and pear stains are different. Give them the same treatment, then rub with liquid detergent. rinse, and wash.

Bloodstains: Never use hot water. Soak in cold water, or else sponge with cold water. Perspiration stains: When

fresh they often respond to a warm water and detergent solution. Sometimes old stains respond with a weak solution of water and white vinegar. Afterwards, wash the spot with water.

Before clothes become stained or in need of a trip to the cleaners, there are good

grooming habits that will help keep them --- and you --- in good shape:

1) Hang garments on suitably shaped hangers as soon as you take them off. That keeps you well pressed.

2) Alternate the garments you wear to give clothes a chance to get rid of wrinkles and return to the shape built into them. That keeps their crisp, new look much longer. 3) Keep clothes in a cool,

dry, airy place, and never hang in closet while wet. 4) Give your entire wardbefore tossing them into a machine. FOR SALE

FOR SALE - Evinrude outboard 5 1/2 h. p. motor. Practically new. . With rereasonably Very verse. Charles White Sinpriced. 19 & 129, East Murphy.

5) Brush dust and lint from clothes frequently, always brushing in direction of the nap. Turn trouser cuffs down and brush out lint and dirt
