Candy Talk

What does chocolate candy make you think of?

A recent study by Barton's reports that many people nostalgically associate chocolate candy with children and "golden times."

Though chocolate is relatively modern—in the sixteenth century, Cortez brought back chocolate beans from Mexico to Spain—candy making has been found in almost all civilizations. In the Middle Ages, sweets were sold or dispensed by pharmacists and spice stores.

In Colonial America, sweets and candies were made in great variety, including many chocolates which were hand moulded into fanciful forms.

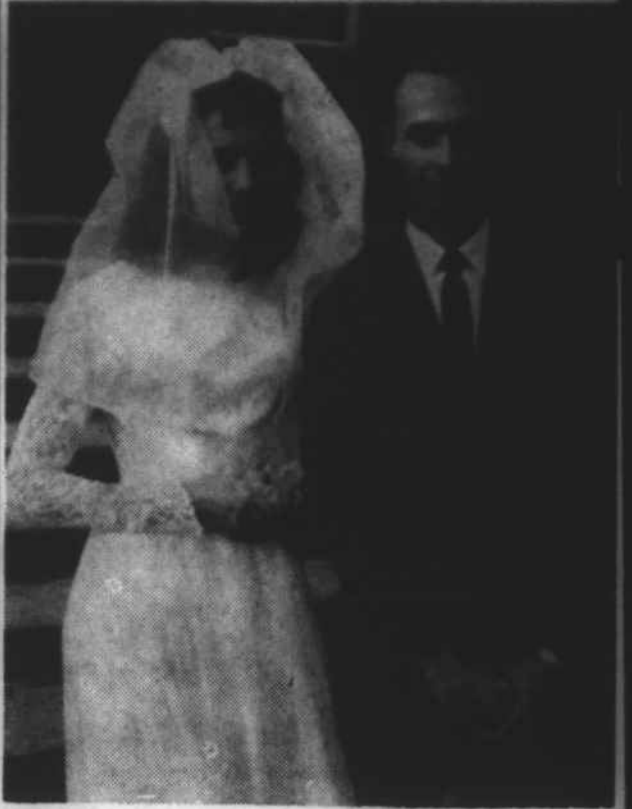

Today, the continental look and flavor of fine chocolates and candies has won a permanent hold on American tastes. Elegant candies now available from companies such as Barton's Candy Corporation come in sculptured and multi-toned forms which are considered the finest of the confectioner's craft. Chocolate candy has become the best expression of hospitality and generosity in homes throughout the United States. (NP Features)
