

LAW ENFORCEMENT

...from page 1

hear Mr. W. B. Julian, Liaison Administrator of the Governor's Committee on Law and Order, explain benefits available to North Carolina under the Omnibus Crime Control and Safe Streets Act of 1968. Mr. Julian stated \$175,540 is presently available in North Carolina to finance planning activities necessary to utilize Omnibus funds which will be available during the next four and one-half years. He also stated that the Act provides the greatest opportunity for advancement of law enforcement ever.

Julian indicated that this was the largest group assembled in North Carolina to date for the purpose of planning for benefits under the Omnibus Act.

Such items as additional street lights, communication equipment, riot control equipment, etc. may be high-priority needs to be identified by the planning group. He further indicated that the Act makes possible a comprehensive study of law enforcement and court changes needed in North Carolina and the United States.

The assembly voted unanimously to form a planning organization. Then, the participants voted to adopt a plan of action as outlined below: A governing board of the organization is to be selected, one representative per group, from the governing agency in each county and municipality. Additionally, one member representing all state enforcement and justice services functioning within the organizational boundaries and one member representing all federal law enforcement and justice services functioning within the organizational boundaries will serve on the governing board.

The conference participants voted to return to their respective agencies for the appointment of members to be governing board and to make these appointments by February 10. The governing

board appointees will assemble as soon as possible for the purpose of making application for a planning grant.

Mr. E. E. Bryson was elected temporary chairman of the organization and asked to assure proper distribution of information and coordination of the infant agency's activities.

SURVEY

... from page 1

needed in the UHWDA for jobs if the industrial and manufacturing growth rates continue at the present rate. This indicates that an additional 29 service businesses, such as electricians and accountants, will be needed by 1974.

Full details of the surveys will be published in several months, and at that time the Scout will go into more detail on the problems of this area and the possible solutions.
