CZAR AND PRESIDENT.

The the trip of President Faure to the Czar of all the Russias was productive of the most friendly results, and the people of these two nations seem to be rejoiced The black bass, wearied and worn and at the outcome of the visit.

Upon the return of President Faure, he sent the following dispatch to the

"At the moment I place my feet once more upon the soil of France, my first thought is for your Majesty, her Majesty the Empress, and the whole Russian nation. The magnificent and cordial re ception given to the president of the republic calls forth throughout France a feeling of emotion and joy. It will leave in our hearts an ineffaceable mem-

"I beg your Majesty once more to accept the expression of my thanks and the wishes I entertain for your Majesty's happiness and that of the Empress and the imperial family, and for the grandeur and prosperity of Russia."

The Czar replied to this message from the Lazelsky Palace, at Warsaw. He

"The Empress and myself are extremely grateful for your kind words just sent to us. It is with pleasure that I shall preserve the memory of the visit paid by the president of the republic to Russia, whose heart has once beaten in unison with that of France." #

A BAD ELEMENT-

The boldness which has characterized the recent actions of Anarchists in Europe, has aroused the Spanish government to the fact that this dangerous element must be gotten rid of. It is stated that plans are being perfected to banish this unsavory class. England will no longer allow Anarchists to land on her shores, and Spain will endeavor to dump them upon us or other American republics.

There is no room for these thieves and disturbers of the peace in our country, and the greatest diligence should be exercised to keep them out. It is not liberty or justice that they are seeking to establish, but downright robbery. This country is as free as a government can be, and yet we have had a taste of their maliciousness.

Our Ambassador Hay to London is proving a regular lion in society.

The leaders of London society, who made his acquaintance during the jubilee season, have been eager to have the Ambassador as a guest. More invitations to country houses have come to him than he could accept during a whole summer.

A Demand for Interest.

A spesial to the Charlotte Observer says that Mr. H. A. Foushee, of Durham, was in Oxford yesterday as attorney for the Union Bank of Richmond, Va., and made demand upon the treasurer of Ox: ford for payment of interest amounting to \$4,300 on \$20,000 of bonds issued by the town of Oxford in aid of the Oxford Coast Line Railroad. Heretofore there has been extended litigation on account of the refusal of the town to pay these bonds, in which suit the town was victorious. The State Supreme Court holding that the issue of bonds was void because of irregularities in the passage of the act incorporating the railroad. It is stated that the demand made yesterday was preparatory to the institution of a new suit in the Federal Court to test in said court the validity of these bonds.

Last year in the cities of Hurley, Wis. and Ironwood, Mich., I cleared above expenses \$500 in six weeks. This year the time I worked I made \$150 a month clear of all expenses. You can use this if you wish. And to begin with I never sold anything before. In fact everyone tried to discourage me but I went ahead and succeeded. In three days last year I look sixt, two orders.

The

of deaths which occur as the result or a surgical operation is attracting general attention, and a strong sentiment against such methods of treatment is fast developing among the most intelligent classes. It seems that in almost every case for which the doctors' treatment is unsuccessful, the learned phasicians decide at once that an operation

cians decide at once that an operation must be performed, and the keen blade

of the surgeon is recklessly resorted to.
Doctors are human, and of course are
liable to make mistakes, but their mis-

takes are too fatal to be indulged in promiscuously, and as so many lives are sacrificed in this manner, it is but natural

for the public to believe that half the operations are unnecessary, besides be-

ing a fearful risk to human life, even if

It is a positive fact, however, that all

operations are not necessary, and that a majority of them are absolutely under-

taken without the slightest chance of success. The doctors have never been

able to cure a blood disease, and a sur-

gical operation is their only method of treating deep-seated cases, such as can-cer and scrofulous affections. Aside

from the great danger, an operation never did and never will cure cancer, as

the disease never fails to return. Can-cer is in the blood, and common sense

teaches anyone that no disease can be

Here is a case where the pain inflicted on a six-year-old boy was especially cruel, and after undergoing the tortuces

produced by the surgeon's knife he rap-idly grew worse. Mr. J. N. Murdoch, the father of the boy, residing at 279 Snodgrass street, Dallas, Texas, writes:

"When my son, Will, was six years old, a small sore appeared on his lip, which did not yield to the usual treatment, but before long began to grow. It gave him a great deal of pain, and con-

tinued to spread. He was treated by several good doctors, who said he had cancer, and advised that an operation

was necessary.
"After much reluctance, we consented,

and they cut down to the jaw bone, which they scraped. The operation was a severe one, but I thought it was the

only hope for my boy. Before a great while the cancer returned, and began to

grow rapidly. We gave him many remedies without relief, and finally upon the

advice of a friend, decided to try S.S.S.

bottle he began to improve. After twenty

bottles had been taken,
