

**Great Your Valentine
With a Cupid's Cake**

Cupid doesn't do everything in this world of ours, with the result that many a girl has won her own happiness with a helping hand.

Even though Leap Year, with its woman's right to pop the question directly is gone, a woman's initiative remains, and with it something special for HIM on Valentine's Day.

The surprise, in return for that special man that day, is a Cupid's Cake.

It is a delicious self-rising cake that will bring smiles to sweet-hearts. It is quick and easy, for with self-rising flour you work the dough as lightly and as little as possible.

And you can be sure of results with this Cupid's Cake. Self-rising flour takes the guesswork out of cake baking, cutting oven failures almost to the vanishing point.

Bake him a Cupid's Cake, and watch HIM smile on Valentine's Day.

CUPID'S CAKE

- 2 1/2 cup sifted self-rising flour
 - 1 1/2 cups sugar
 - 1/2 cup soft shortening
 - 1 cup sweet milk
 - 1 1/2 teaspoons vanilla (or half almond)
 - 4 egg whites (1/2 cup)
- Sift together the flour and sugar.

Add shortening and half of the milk and beat two minutes. Add remaining milk, the flavoring and unbeaten egg whites and beat another two minutes. Pour into two 8-inch layer cake pans and bake in a moderate oven (350° F.) 30 to 35 minutes. Cool before frosting.

FROSTING

- 2 egg whites, unbeaten
 - 1 1/2 cups sugar
 - 1/4 teaspoon cream of tartar (or 1/2 teaspoon corn syrup)
 - 1/2 cup cold water
 - Dash of salt
 - 1 teaspoon vanilla (or half almond)
 - Red coloring
- Place all ingredients except flavoring and coloring in top of double boiler; mix thoroughly. Cook over boiling water, beating constantly with rotary or electric beater until mixture forms peaks, about 7 minutes. Remove from heat, add flavoring, and beat until of spreading consistency. Reserve 1/2 cup frosting to color pink later and cover to prevent crust forming on top. Use remaining white frosting in filling and frosting for cake. After cake has been iced, allow to stand until a slight crust has formed. Trace heart and arrow design on the top, outline design with the pink frosting, then fill in the center design with remaining pink frosting.

By CHARLES H. SULLIVAN
Negro County Farm Agent

Tobacco farmers in Jones County are making a serious mistake by not having their tobacco fields tested for plant food needs. Tobacco fertilization in the flue-cured area is an important operation. However in my travel about the county, I have discovered many farmers purchasing fertilizer without due consideration to the soil needs.

The success of fertilization

**IN THE SUPERIOR COURT
BEFORE THE CLERK**

North Carolina
Lenoir County
First Citizens Bank and Trust Company, Administrator of the estate of C. J. O'Quinn, deceased.

vs.
Hazel L. O'Quinn (widow of C. J. O'Quinn), Judy Ann O'Quinn (minor), and Cynthia O'Quinn (minor).

**NOTICE OF SUMMONS BY
PUBLICATION**

The above named respondents, and particularly the respondent Cynthia O'Quinn (minor), will take notice that a special proceeding entitled as above has been commenced in the Superior Court of Lenoir County, North Carolina, by the petitioner as administrator of the estate of C. J. O'Quinn, deceased, seeking to obtain an Order of Sale for a certain parcel of land belonging to the estate of C. J. O'Quinn, deceased, and situate in Lenoir County, North Carolina, for the purpose of making assets with which to pay the debts of the said estate of C. J. O'Quinn, deceased, and seeking direction from the Court for the distribution of the proceeds of the sale to such lawful owners as may be adjudicated by the Court, the said lands sought to be sold being more particularly described as follows:

Lying and being in the City of Kinston, Lenoir County, North Carolina, an beginning at the corner of the factory lot now occupied by the Dile Leaf Tobacco Company and formerly owned by Hughes-Martin Factory (also known as Kinston Warehouse Company lot), at the corner between said lot and the lot of the first parties herein, and runs south with the Hughes-Martin line 187 feet; thence eastwardly and parallel with Vernon Avenue 45 feet; thence northwardly and parallel with Vernon Avenue 45 feet; thence northwardly and parallel with the first line 187 feet to Vernon Avenue; thence westwardly with Vernon Avenue 45 feet to the beginning, and being the identical property conveyed to Charles J. O'Quinn by deed from Jay Roberson and wife, dated July 23, 1946, and of record in Book 228, at Page 359, and being the premises designated as 106 West Vernon Avenue, Kinston, North Carolina.

And the said respondent Cynthia O'Quinn (minor), as well as the other respondents above listed, will further take notice that she is required to appear at the office of the Clerk of Superior Court of Lenoir County in the Courthouse in Kinston, North Carolina, within ten days after the 26th day of February, 1953, and answer or demur to the petition filed in said special proceeding or the petitioner will apply to the Court for the relief demanded in said petition.

This 27th day of January, 1953.

has in using correct amounts. To much fertilizer may cause serious results, or too little fertilizer may likewise produce inferior tobacco. For example, soils that are heavy in nitrogen may cause thick, heavy-bodied tobacco high in nicotine and low in quality.

Soils that are high in nitrogen need 1000 to 1400 lbs of 3-10-8 fertilizer per acre. For average sandy soils and sandy loams, 900 to 1000 lbs of 4-9-10 ferti-

lizer per acre is a general recommendation.

However, for the correct fertilizer for your soil, have your soil tested. Now is the time to have soil tested. Don't wait.
