PAINT CAN BEAUTIFY YOUR HOME

Walls freshly painted will give a "new look" to your home. You may even want to try doing your own painting and you need not be an expert to do it yourself — just follow the directions of the manufacturer. You can get most any wall color you want. Paint manufacturers have on the market hundreds of ready mixed paints in various hues and shades — many of them give directions for combining certain colors to get a desired color. It is a matter of individual taste whether walls, woodwork, and doors of a room are all painted the same color, finished in a deeper or lighter shade of the wall color, or the wood trim painted white.

If you are planning to paint your walls, collect the color charts, study them carefully, and then plan your color schemes. A few suggestions will guide you in selecting colors:

1. Exposure of room — in a North room use warm colors; East, gradually cooler colors; South, cool colors; and West, gradually warmer colors.
2. When a room has many openings, paint walls, woodwork and door the same color.
3. Dark walls should be used only in a room with large window areas, and it is desirable to have light ceiling and furnishings. Dark walls make a room look small.
4. White or off white ceilings reflect light.
5. Colors are affected by the use of other colors.
6. Plan a complete color scheme for rooms opening into each other.

GARDEN TIME

Perhaps you are ready to develop a landscape plan for a new home or to modify your present plan. In either case there are certain basic principles which may be followed that will give a pleasing effect when the job is completed. Good design is based on the intelligent use of lines, colors, textures and forms.

Ann, Mrs. Hester is the former Mary Ann Ward of Goldsboro.

Since the space you have is a major consideration in developing your landscape setting, the lot may be divided into three general areas: public; private; and service.

The public area is what the passers-by see when they drive by your home. In this area the most important single feature is the lawn. Someone has said that "The lawn is the canvas on which we create our landscape picture," and is probably the most expensive part of the landscape development. The soil should be tested, well prepared and planted with grass adapted to your area.

Two other features should be considered in this public area: the foundation planting, and permanent trees. The purpose of the foundation planting is to blend the house into the lot. Here many architectural lines can be softened

RICE-PEANUT BRITTLE CRUNCH DESSERT

Next time you have hot, fluffy rice for dinner cook enough for more than one meal. It is quite a time saver to have a supply in the refrigerator for "quickie" desserts. Here is a recipe your teenager can prepare for luncheon on your next busy day. Serve a menu of bacon, lettuce and tomato sandwiches, glasses of cool milk and delicious, so-easy Rice-Peanut Brittle Crunch dessert. Once your family tries this pudding they'll want to have it often. It is a magic formula for luring reluctant young helpers into the kitchen.

- 2 cups cooked rice
- 1 cup milk
- ½ teaspoon salt

- 1 cup whipping cream
- ½ cup brown sugar
- 1 teaspoon vanilla flavoring
- ¾ cup crushed peanut brittle

In top part of double boiler, combine rice, milk, and salt; cover. Place over boiling water and cook about 30 minutes, or until milk is absorbed, tossing lightly with a fork several times. Chill thoroughly.

Combine whipping cream, sugar, and vanilla; chill. Beat until stiff. Fold in rice mixture and crushed peanut brittle. This may be chilled about 30 minutes, or served immediately. Yields six servings.
